Introduction

Overview

1

Overview

During the plant layout process, fast project execution and the highest degree of availability in operation are crucial factors. SIMOTICS HV M addresses both of these factors:

- Maximum reliability under extreme conditions – as well as preventive service concepts employing cloud-based status data analysis – ensure the high degree of availability.
- The fast, smooth project execution is based on short delivery times, user-friendly and efficient engineering tools, the highest degree of flexibility and simple integration into plants and systems as a result of the extremely low dimensions and weights referred to the particular power rating.

This is complemented by low operating costs based on minimum maintenance costs and high efficiency. SIMOTICS HV M motors are available in 2-, 4-, 6-, 8-, 10- and 12-pole versions (additional pole numbers available on request); they cover a speed control range up to 4800 rpm. The power spectrum of the series extends from 0.5 up to 29 MW at 50 Hz – and up to 31 MW at 60 Hz. As a consequence, users profit from the advantages of this modular high-voltage motor concept over a wide power range.

Note:

In addition to the general technical data, this catalog includes detailed descriptions of the SIMOTIC HV M standard versions and options that can be supplied by specifying order codes. It should be noted that certain order codes and combinations of order codes are not applicable for all motor types. Customized solutions can be offered on request.

Application

SIMOTICS HV M is at home in the following industries:

- Oil & Gas
- Petrochemical & Chemical
- Steel
- Marine
- Cement
- Fiber
- Water/wastewater
- Power generation
- Mining

Typical applications are pumps, fans, compressors, mixers, mills, conveyor belts, rolling mills, ship's drives.

Benefits

- Short delivery period and high delivery reliability
- Very reliable, even under extreme conditions
- Long service life with low maintenance costs
- High efficiency of up to 98 %
- Flexible and precisely adaptable to a wide range of applications
- High power density due to low envelope dimensions and weight
- Simple selection and configuration with standard engineering tools
- Perfectly harmonized for operation with SINAMICS medium-voltage converters
- Motor dimension drawings and 3D motor data available from the PLM software (Product Lifecycle Management) or on request

Additional information

Article number code

The Article No. comprises a combination of digits and letters.

Options can be added by using an additional hyphen and the letter Z. In addition, the order codes for the corresponding options need to be specified.

Example:

1RQ7 710-4JA60-0CG0-Z A65 + G50 + M13

Ordering data:

- Complete Article No. and order code(s).
- If a quotation is available, in addition to the Article No., the quotation number should also be specified.
- When ordering a complete motor as a spare part, please specify the factory serial No. of the previously supplied motor as well as the Article No.

Overview

General technical versions

Overview

Overview

Motor protection

Series for both standard and optional monitoring and protective devices are available for motor protection.

Protective device	Description
Stator winding monitoring	6 PT100 resistance thermometers for temperature monitoring as standard.
Anti-friction bearing monitoring	Measuring nipple for shock pulse measurement as standard. Optional PT100 resistance thermometer for temperature monitoring.
Sleeve bearing monitoring	Optional PT100 resistance thermometer for temperature monitoring. Optional for circulating oil cooling: Throttle valves, manometer and flowmeter in the oil intake line. Optional holes in the oil discharge line to mount a thermometer or a sight glass to monitor the oil flow.
Shaft vibration monitoring	Optional for motors with sleeve bearings.
Air temperature monitoring in the cooling circuit	Optional using a thermometer in the cooler assembly on the air intake and air discharge side.
Leakage water monitoring	Optional using sensors in the cooler housing for water-cooled motors.
Starting and speed monitoring	Optional rotary pulse encoder for motors for converter operation.
Anti-condensation heating	Standard for SIMOTICS HV M motors.

Electrical design

High voltage motors have the Siemens MICALASTIC insulation system according to thermal class 155 (F).

SIMOTICS HV M motors are always carried out with copper rotors.

Motor connection and terminal boxes for high voltage motors

The motor terminal boxes are generously dimensioned. This design allows cables, which are generally used worldwide, to be simply and quickly connected up as well as to accommodate all of the generally used cable entry fittings.

Arrangement of the motor terminal box (standard version):

When viewing the drive side, the motor terminal box is mounted at the righthand side of the stator frame with cable entry from the bottom. When requested, it can be mounted on the lefthand side. However, it must be specified when ordering. When requested, the terminal box can be mounted, rotated through 90° or through 180° if the spatial situation at the machine permits this (except for terminal boxes with cast cable entry glands).

Terminal arrangement according to DIN 42962.

Degree of protection of the motor terminal box: IP55, IP56, IP66 – depending on the terminal box type (refer to the table).

The motor terminal boxes comprise a lower section or housing, bolted to the stator frame, and a removable cover. The 1XA8711, 1XB8911 and 1XB8751 terminal boxes that are normally used have bushings manufactured out of casting resin. All of the other terminal boxes have cast-resin post insulators with bolted bus-bars (exception: cable connector connection).

All motor terminal boxes are short-circuit proof. If a short-circuit occurs in the motor, all of the forces generated by the short-circuit current are reliably handled by the components in the terminal box (e.g. cast-resin post insulators).

Further, all motor terminal boxes are short-circuit proof. In the unlikely event of arcs occurring inside the terminal box the generated pressure will be immediately dissipated with the use of a pressure relief mechanism.

Short-circuit strength and short-circuit proof of the motor terminal boxes used as standard:

- 400 MVA at 6 kV; 0.2 s
- 700 MVA at 10 kV; 0.2 s

These values correspond to a rated peak withstand current of approx. 100 kA.

Motor connecting cable and cable entry fittings are not supplied with the motor.

Protection for line-operated high voltage motors against switching overvoltages

The motor windings are dimensioned according to the requirements of IEC 60034-15. If higher overvoltages can occur, over-voltage protection is required at the supply side or can be offered as a motor option.

Overview

Overview of the generally used motor terminal boxes

Terminal box	Rated voltage kV	Current A

Mechanical design

Overview

Bearing version

Motors for connection to the line supply have anti-friction bearings or sleeve bearings as standard according to the following overview.

The bearing concepts for converter driven motors depend on the speed control range.

Overview, bearing versions

Motor type	Bearing version IM B3, IM B35		Number of poles 4		Number of poles ≥ 6		IM V1
	Number of poles 2 50 Hz	60 Hz	50 Hz	60 Hz	50 Hz	60 Hz	
1R.6/1S.6 45. 1R.6/1S.6 50.	Anti-friction bearings (sleeve bearings optional) ¹⁾	Sleeve bearings	Anti-friction bearings (sleeve bearings optional)	Anti-friction bearings (sleeve bearings not available)			
1R.6/1S.6 56. 1R.7/1S.7 63. 1R.7/1S.7 71. 1R.7/1S.7 80.	Sleeve bearings						
1R.7/1S.7 90.	N/A	N/A	Sleeve bearings	Sleeve bearings	Sleeve bearings (anti-friction bearings optional)	Sleeve bearings (anti-friction bearings optional)	N/A

Anti-friction bearings

Motor series	Type of construction	Shaft height mm	Drive end	Non-drive end
1R./1S.	IM B3	450	Deep-groove ball bearings (locating bearing)	Deep-groove ball bearings (floating bearing)
		500 ... 900	Double bearings: Deep-groove ball bearings and cylindrical-roller bearings (locating bearing)	Cylindrical-roller bearings (floating bearing)
	IM V1	450	Deep-groove ball bearings (floating bearing)	Double-row ball bearings: Deep-groove ball bearings and angular-contact ball bearings (thrust bearing)
		500 ... 560	Deep-groove ball bearings (floating bearing)	Angular-contact ball bearings (thrust bearing)
		630 ... 710	Deep-groove ball bearings (floating bearing)	Pair of angular-contact ball bearings (thrust bearing)
		800	Deep-groove ball bearings (floating bearing)	Pair of angular-contact ball bearings (thrust bearing) and deep-groove ball bearings
		900	N/A	N/A

¹⁾ Motor types 1R.6/1S.6 504-... and 1R.6/1S.6 506-... only available with sleeve bearings.

Overview (continued)**Sleeve bearings**

Generally, the motors are equipped with two floating bearings. This means that the rotor must be axially guided by the bearings of the driven machine through a coupling with limited axial play. An appropriate sleeve bearing can be installed at the drive end if the motor rotor is to be axially guided.

Assignment of oil-ring lubrication or circulating-oil lubrication to the shaft heights:

The DE bearing is not insulated, the NDE bearing is insulated. Type EM center flange bearings and also type EF lateral flange bearings are used. 2-pole motors of the shaft heights 450 and 500 as well as 4-, 6- and 8-pole motors of the shaft heights 710 and 800 are equipped with center flange bearings. All other motors have lateral flange bearings. When using four lobe bore sleeve bearings (e.g. shaft height 710, 2-pole) it is mandatory that a redundant oil supply is used.

Shaft height	No. of poles	Oil ISO VG	T _{ambient} [°C]	50 Hz				60 Hz					
				Core length				Core length

Overview (continued)

Bearing insulation

NDE bearing insulation

Line operation (DOL):

For all direct online motors, NDE bearing is insulated.

Converter operation (VSD):

For operation with SINAMICS LV, SINAMICS PERFECT HARMONY and SINAMICS GM150/SM150 with sine-wave filter, NDE bearing is insulated.

DE and NDE bearing insulation

For all other than the above mentioned motor types or applications (e.g. operation with GM150/SM150 without sine-wave filter), both bearings are insulated as a standard and an earthing device is necessary.

When specified by the customer, insulated bearings can be provided at the DE and NDE for any motor type.

If both bearings are insulated, an additional detachable link is provided for this bearing insulation.

Vibration response

Horizontal motors up to 3600 rpm fulfill, as standard, vibration severity level A according to IEC 60034-14. Vibration severity level B as well as values for vertical motors are available on request.

Balancing quality

The motor rotors are balanced dynamically with half feather key (but without mounted coupling halves). The balancing quality according to ISO 1940 is, up to and including 1500 rpm, G 1.5 and beyond this, G 1.

Direction of rotation, fan

The direction of rotation must be specified in every order.

SIMOTICS HV M motors have unidirectional inner and outer fans. In particular, this means that for motors with two-sided ventilation bidirectional fan design is not possible.

SIMOTICS HV M motors with single side ventilation, bidirectional fan design is available on request. (Bidirectional fan design may result in reduced power rating and efficiency as well as a higher noise level.)

Paint finish

Unless otherwise specified in the order, the motors are supplied in the standard paint finish color RAL 7030 (stone gray). Other colors are available on request at an additional cost. Motors can be optionally supplied with a special paint finish.

The standard paint finish is classified in the "Moderate" climate group according to IEC 721-2-1. It is suitable for:

- Installed indoors or outdoors under a roof, where the motors are not exposed to any direct effects of the weather.
- Temperatures, continuously up to +100 °C, briefly up to +120 °C
- Relative air humidity up to 85 % at +25 °C continuously; briefly up to +100 % at +30 °C

The **special paint finish** is classified in the "Worldwide" climate group acc. to IEC 721-2-1. It is suitable for:

- Installed outdoors, where motors are directly exposed to the effects of the weather, e.g. direct solar radiation
- Additional temperature and humidity ranges
- Temperatures, continuously up to +120 °C, briefly up to +140 °C

Typical installation locations are industrial environments and coastal areas. For outdoor applications in salt laden atmospheres, one of the options E81, E82 or E83 should be selected.

Standards and regulations

The motors comply with the appropriate standards and regulations, especially those listed in the table below.

Title	IEC	DIN/EN/ISO
General specifications for rotating electrical machinery	IEC 60034-1	DIN EN 60034-1
Degrees of protection for rotating electrical machinery (IP code)	IEC 60034-5	DIN EN 60034-5
Cooling methods for rotating electrical machinery (IC code)	IEC 60034-6	DIN EN 60034-6
Types of construction, mounting types and terminal box positions for rotating electrical machinery (IM code)	IEC 60034-7	DIN EN 60034-7
Terminal designations and direction of rotation for rotating electrical machinery	IEC 60034-8	DIN EN 60034-8
Mechanical vibration of rotating electrical machinery	IEC 60034-14	DIN EN 60034-14
Rated impulse voltages for rotating electrical machinery	IEC 60034-15	DIN EN 60034-15
Electrical insulation – thermal classification	IEC 60085	DIN EN 60085
Mechanical vibration – requirements on the balancing quality of rotors	–	DIN ISO 1940-1
Determining the losses and efficiency from tests	IEC 60034-2-1	DIN EN 60034-2-1

Overview

The motors in this catalog are designed for operation with a flexible coupling. The maximum half coupling weights are shown in the table "Maximum allowable coupling weight".

Note:

Motor and driven machine have to be aligned according to manual.

If the coupling weight exceeds the maximum value, feasibility has to be checked.

Motors for line operation

Overview

Normal conditions

Selection and ordering data included in this chapter are valid for standard operating and installation conditions:

- Installation altitude of the motor ≤ 1000 m above sea level
- Ambient temperature (= coolant temperature for air-cooled motors) = 40 °C
- Coolant temperature for water-cooled motors = 25 °C
- Thermal class 155 (F) utilized to 130 (B)
- Continuous duty S1
- Permissible tolerances in compliance with IEC/EN 60034-1:
 - Rated voltage $V_{rated} \pm 5\%$
 - Rated frequency $f_{rated} \pm 2\%$

SIMOTICS HV M series is designed for direct-on-line starting under certain starting conditions.

Motor start up has not to be checked, if the following conditions are met:

- Voltage during start up is not below 0.9 x rated voltage
- Load characteristic complies with $T \sim n^2$
- Max. load torque at rated speed does not exceed value acc. table below

Shaft height [mm]	450		500		560		630		710		800		900	
Number of poles	2	4...	2	4...	2	4...	2	4...	2	4...	2	4...	4...	
SIMOTICS HV M														
max. load torque = $T_{rated} \times$	0.75	0.9	0.7	0.9	0.6	0.9	0.5	0.9	0.5	0.9	0.5	0.9	0.4	0.8

Start-up with max. permissible inertia according to "selection and ordering data" is possible either for three times from cold or two times from warm motor condition (natural coast down between consecutive starts assumed).

If limits of load characteristic and/or inertia are exceeded, the motor start-up calculation has to be checked. In this case, please contact your Siemens sales representative.

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RA6, 1RA7	
Rated voltage	4 ... 11 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP23/IP24W
Cooling method	IC01
Stator winding insulation	Thermal class 155 (F), utilized to 130 (B)
Shaft height	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel

Position of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Efficiencies according to IEC 60034-2-1:2007; stray load losses determined by statistical evaluation of measurements.

Higher pole numbers are available on request.

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

Position of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

²⁾ Data of vertical motors (IM V1) on request.

Note:

Efficiencies according to IEC 60034-2-1:2007; stray load losses determined by statistical evaluation of measurements.

Electrical data is also valid for operation with SINAMICS PERFECT HARMONY drives.

For ordering, please note the 10th and 11th position of the article number code.

Motors for line operation

Air-cooled motors

SIMOTICS HV M 1RA6, 1RA7

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Efficiencies according to IEC 60034-2-1:2007; stray load losses determined by statistical evaluation of measurements.

Higher pole numbers are available on request.

Electrical data is also valid for operation with SINAMICS PERFECT HARMONY drives.

For ordering, please note the 10th and 11th position of the article number code.

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

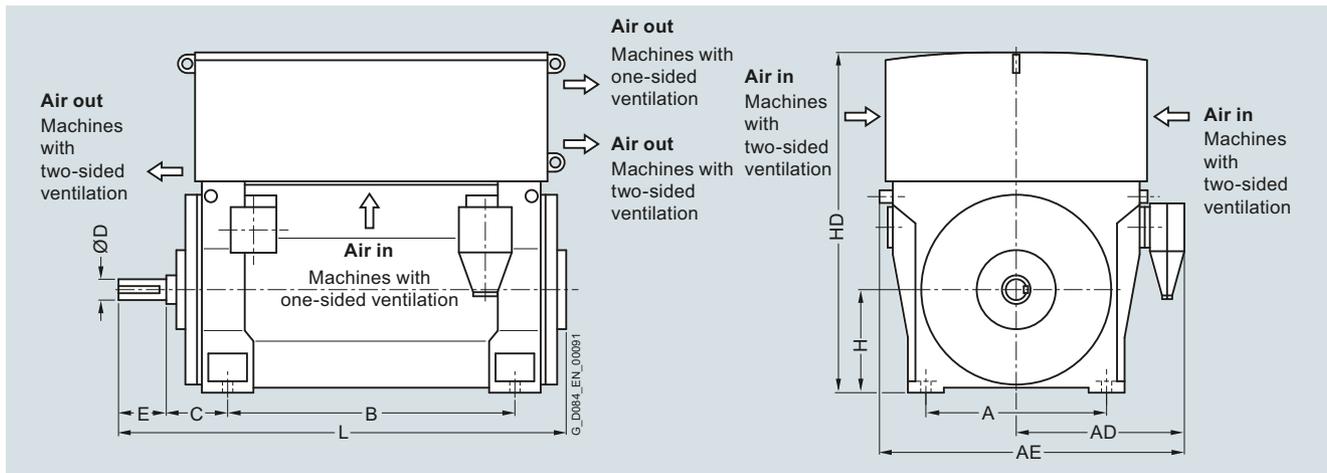

²⁾ Anti-friction bearings only for 50 Hz operation.

Note: Higher pole numbers are available on request.

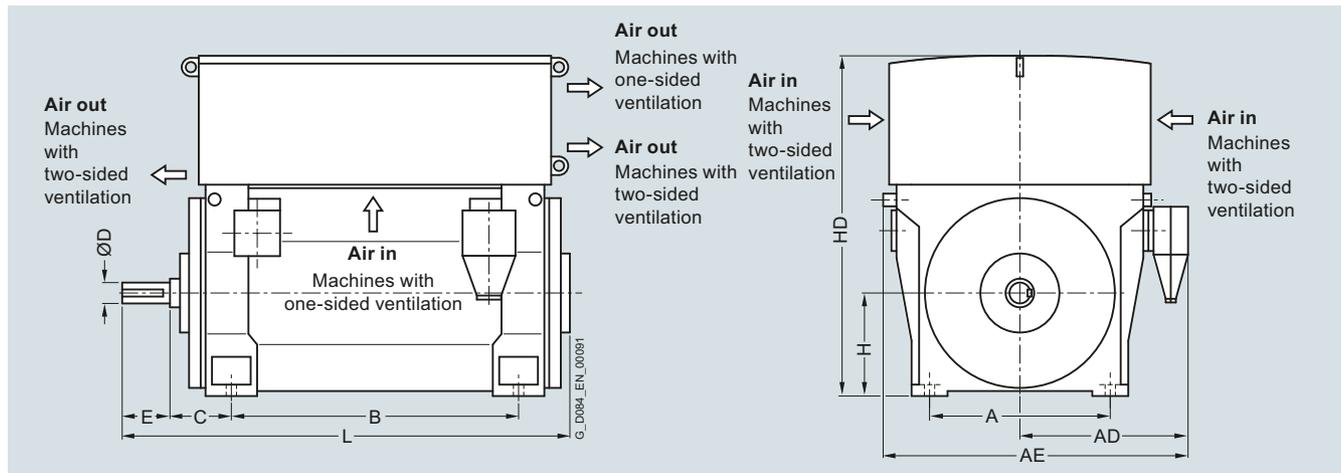

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

Motors for line operation

Air-cooled motors

SIMOTICS HV M 1RA6, 1RA7

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ For the 60 Hz version, sleeve bearings are standard, "-Z K96" not necessary.

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RQ6, RQ7	
Rated voltage	4 ... 11 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC611/IC616/IC666
Stator winding insulation	Thermal class 155 (F), utilized to 130 (B)
Shaft height ¹⁾	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 710 mm	Housing: Steel Cooling enclosure: Steel

¹⁾ For shaft height 800 motor data, refer to Chapter 3, section "Converter with non-sinusoidal output". The locked-rotor torque and locked-rotor current data are available on request.

Motors for line operation

Air-cooled motors

SIMOTICS HV M 1RQ6, 1RQ7

Technical data (continued)

Power ranges for IEC motors for line operation

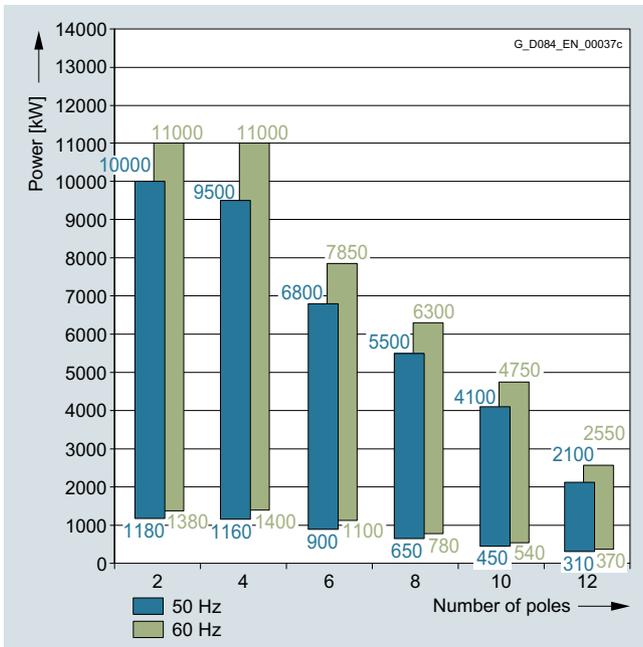

1RQ6, 1SG6 (Ex ec), 1SB6 (Ex pxb) series

1RQ7, 1SG7 (Ex ec), 1SB7 (Ex pxb) series

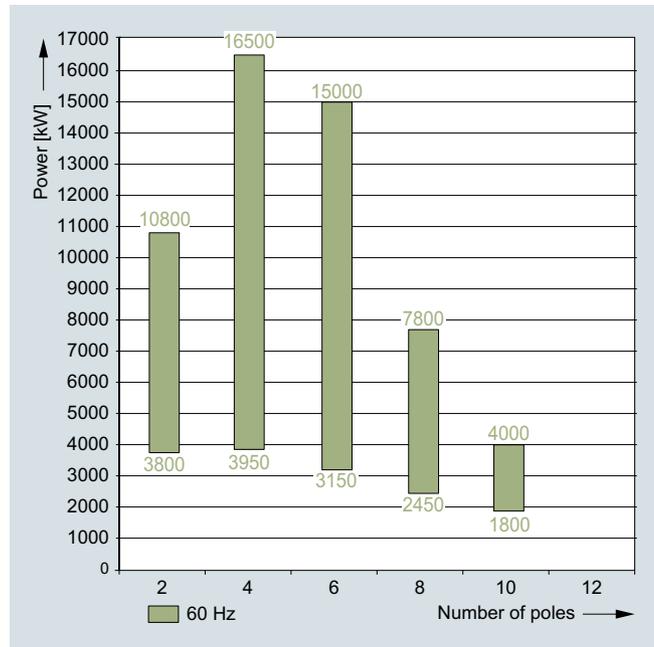

Insulation system, thermal class 155 (F), utilized to 130 (B).

Ambient temperature up to 40 °C, installation altitude up to 1000 m.

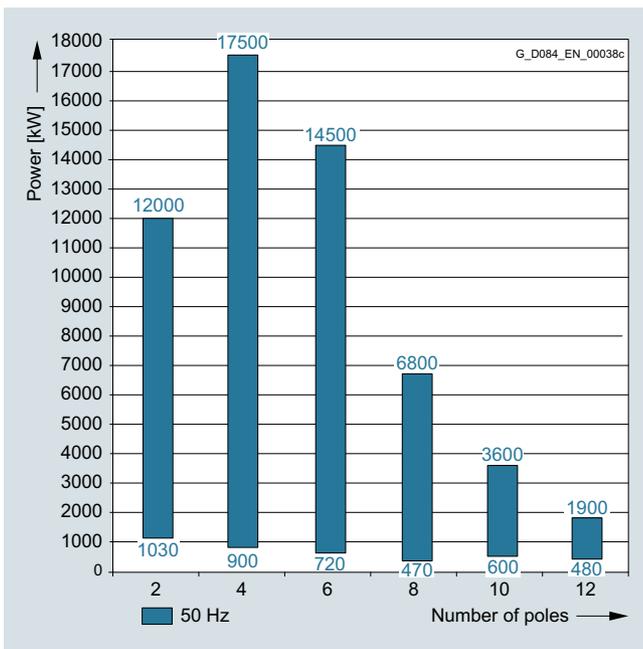

2

4 to 6.6 kV; 50 Hz and 60 Hz

13.8 kV; 60 Hz

9 to 11 kV; 50 Hz

Selection and ordering data

The following data also apply to explosion-protected motors 1SB6/1SB7 (Ex pxb) and 1SG6/1SG7 (Ex ec).

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Efficiencies according to IEC 60034-2-1:2007; stray load losses determined by statistical evaluation of measurements.

Electrical data is also valid for operation with SINAMICS PERFECT HARMONY drives.

For ordering, please note the 10th and 11th position of the article number code.

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

²⁾ Data of vertical motors (IM V1) on request.

³⁾ 1RQ7 types with rated voltage below 4.16 kV on request.

Position of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Efficiencies according to IEC 60034-2-1:2007; stray load losses determined by statistical evaluation of measurements.

Higher pole numbers are available on request.

Electrical data is also valid for operation with SINAMICS PERFECT HARMONY drives.

For ordering, please note the 10th and 11th position of the article number code.

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

²⁾ 1RQ7 types with rated voltage below 4.16 kV on request.

Selection and ordering data

The following data also apply to explosion-protected motors 1SB6/1SB7 (Ex pxb) and 1SG6/1SG7 (Ex ec).

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SG6 and 1SG7 series. For the 1SB6 and 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

³⁾ Anti-friction bearings only for 50 Hz operation.

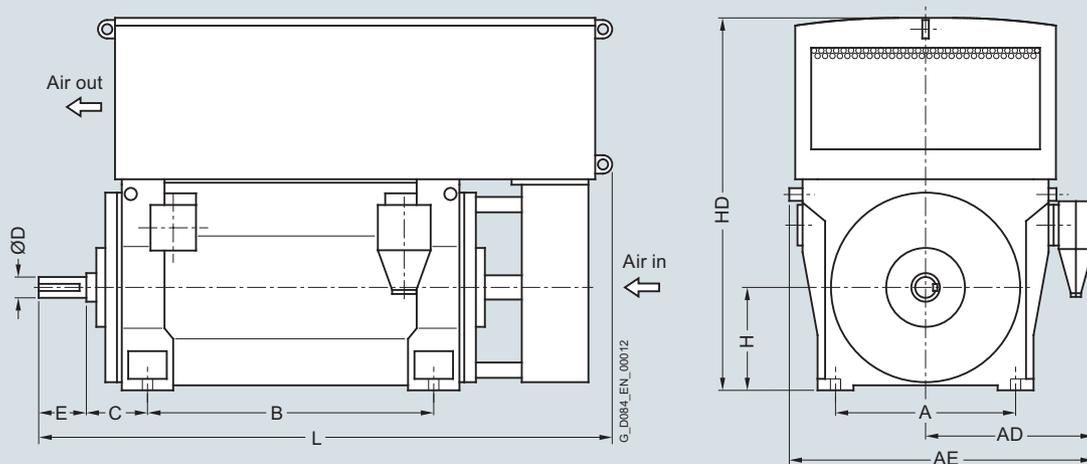

⁴⁾ Including air inlet silencer.

¹⁾ The dimensions are also valid for the 1SG6 and 1SG7 series. For the 1SB6 and 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

²⁾ Anti-friction bearings only for 50 Hz operation.

³⁾ Including air inlet silencer.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SG6 and 1SG7 series. For the 1SB6 and 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

1RQ6566-4JE.4 ³⁾	9950	2400	1210	2100	180	240	3030	1400	1250	1320	26	8

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SG6 and 1SG7 series. For the 1SB6 and 1SB7 series, the dimensions might change as follows due to the required purging system: AC + 400 mm, AE + 300 mm. Detailed drawings are available on request.

³⁾ Vertical type of construction, only in the 50 Hz version.

SIMOTICS HV M 1RN6, 1RN7

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RN6, 1RN7	
Rated voltage	4 ... 11 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC81W/IC86W
Stator winding insulation	Thermal class 155 (F), utilized to 130 (B)
Shaft height¹⁾	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 710 mm	Housing: Steel Cooling enclosure: Steel

¹⁾ For shaft height 800 motor data, refer to Chapter 3, section "Converter with non-sinusoidal output". The locked-rotor torque and locked-rotor current data are available on request.

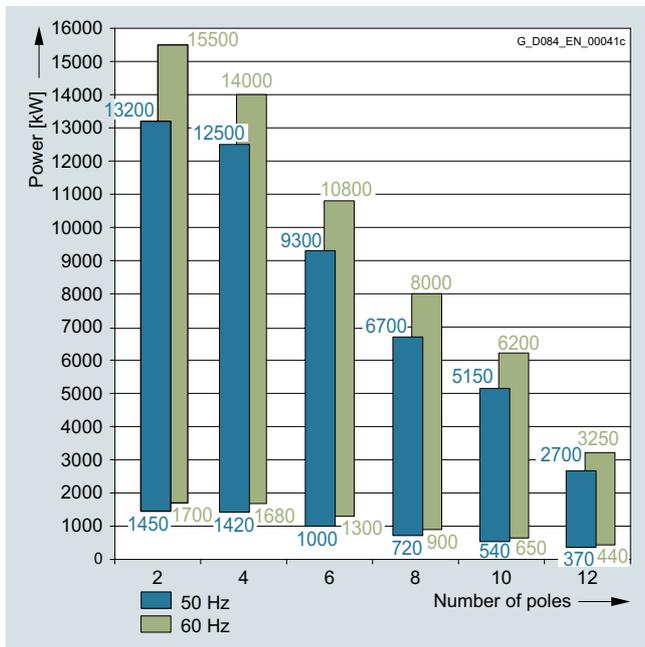

Technical data (continued)

Power ranges for IEC motors for line operation

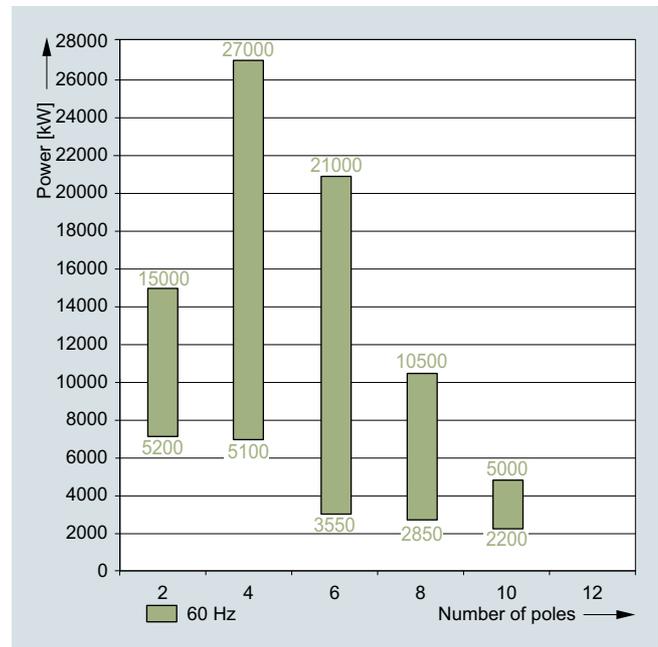

1RN6, 1SL6 (Ex ec), 1SQ6 (Ex pxb) series

1RN7, 1SL7 (Ex ec), 1SQ7 (Ex pxb) series

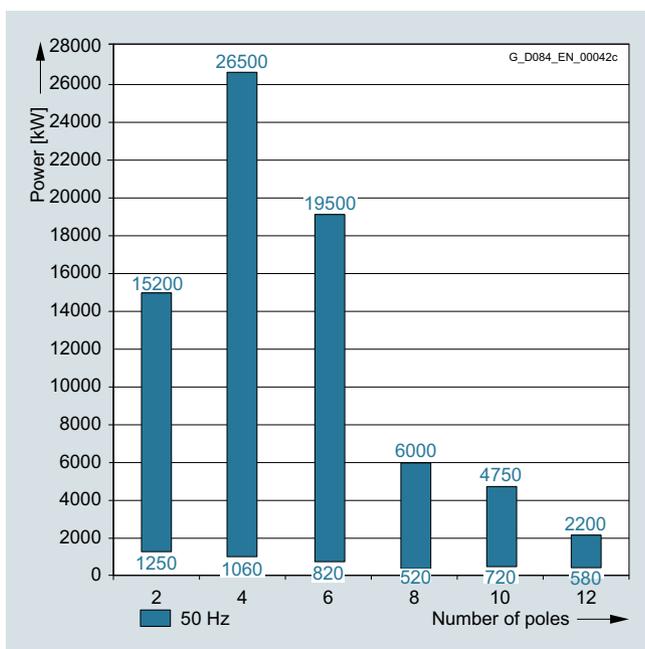

Insulation system, thermal class 155 (F), utilized to 130 (B).
Coolant temperature up to 25 °C, installation altitude up to 1000 m.

4 to 6.6 kV; 50 Hz and 60 Hz

13.8 kV; 60 Hz

9 to 11 kV; 50 Hz

Motors for line operation

Water-cooled motors

Higher pole numbers are available on request.

Electrical data is also valid for operation with SINAMICS PERFECT HARMONY drives.

For ordering, please note the 10th and 11th position of the article number code.

¹⁾ Max. permissible external moment of inertia for three starts from cold or two starts from warm under the conditions described on [page 2/2](#).

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SL6 and 1SL7 series. For the 1SQ6 and 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

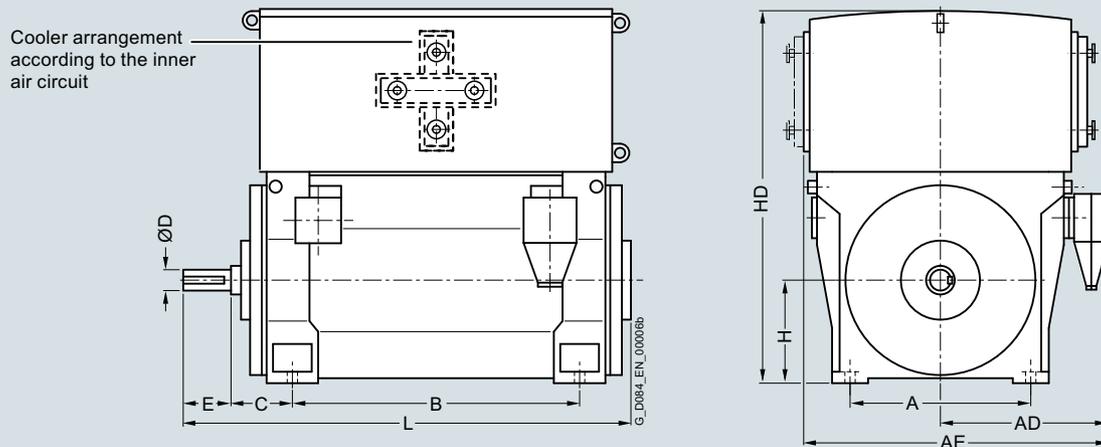

³⁾ Anti-friction bearings only for 50 Hz version.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SL6 and 1SL7 series. For the 1SQ6 and 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

Motors for converter operation

General

Sinusoidal and non-sinusoidal converter output

Overview

By using variable speed drives, cost savings can be achieved in many applications compared to fixed-speed operation.

The SIMOTICS HV M motors are designed for an optimized drive system with the appropriate SINAMICS converters, couplings and gear units to achieve a reliable drive train with high availability and long lifetime, which results in low lifecycle costs. The integrated drive system also features engineering tools that allow the configuration of the entire drive train and the automation environment with optimized parameters. A tailor-made service concept secures the effective operation of the whole drive train application over a long time.

Sinusoidal output

For operation with medium-voltage converters SINAMICS PERFECT HARMONY or SINAMICS GM150 and SINAMICS SM150 with sine-wave filter, as a result of the sinusoidal output, line motors for applications with square-law load characteristic are suitable. For converter operation, these motors must be equipped with electrically-isolated bearings at the NDE. The technical data can be taken from the tables in Chapter 2. For motors with shaft height 800, the technical data for constant torque load characteristic are shown in Chapter 3, section "Converter with sinusoidal output".

The insulation system of these motors corresponds to thermal class 155 (F) – and they are generally utilized to thermal class 130 (B).

Non-sinusoidal output

The SIMOTICS HV M motor series is also available in special design versions for operation with medium voltage converters or low-voltage SINAMICS G and SINAMICS S drive converters (without sine-wave filter).

These motors, as standard, have a reinforced stator winding insulation so that they can be fed from the specified drive converters without requiring a sine-wave filter. Further, for the medium-voltage version of the motors, both bearings are electrically insulated and the shaft is equipped with a grounding system.

The technical data can be taken from the tables in Chapter 3, section "Converter with non-sinusoidal output".

The insulation system of these motors corresponds to thermal class 155 (F). 1R.6 motors are generally utilized to thermal class 155 (F), 1R.7 motors to 130 (B).

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RA6, 1RA7	
Rated voltage	690 V ... 11 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP23
Cooling method	IC01
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 710 mm	Housing: Steel Cooling enclosure: Steel

The following versions can be offered on request:

- 2-pole up to 75 Hz
- 4-pole up to 100 Hz
- 6-pole up to 90 Hz

For individual motor types, it must be ensured that the motor does not run-through any critical speed in the required speed control range and that the maximum speed does not exceed the mechanical speed limit of the motor! Please contact your Siemens sales partner regarding this check. The motor types are marked with footnotes in the following data tables.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

1) Standard values; higher speed limits on request.

2) Data of vertical motors (IM V1) on request.

3) There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

4) Different number of parallel winding systems possible

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Motors for converter operation

Converter with non-sinusoidal output

1) Standard values; higher speed limits on request.

2) Data of vertical motors (IM V1) on request.

3) There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

4) Utilization 130 (B) on request.

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details see [page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

¹⁾ Standard values; higher speed limits on request.

²⁾ Different number of parallel winding systems possible.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

1) Standard values; higher speed limits on request.

2) There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

3) Data of vertical motors (IM V1) on request.

4) Utilization 130 (B) on request.

Motors for converter operation

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details see page 3/2.

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RQ6, 1RQ7	
Rated voltage	690 V ... 10 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC611/IC616/IC666
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 800 mm	Housing: Steel Cooling enclosure: Steel

The following versions can be offered on request:

- 2-pole up to 75 Hz
- 4-pole up to 100 Hz
- 6-pole up to 90 Hz

For individual motor types, it must be ensured that the motor does not run-through any critical speed in the required speed control range and that the maximum speed does not exceed the mechanical speed limit of the motor! Please contact your Siemens sales partner regarding this check. The motor types are marked with footnotes in the following data tables.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

1) Standard values; higher speed limits on request.

2) Data of vertical motors (IM V1) on request.

3) There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

4) Different number of parallel winding systems possible.

Position of the Article No.

For shaft heights 450 mm to 560 mm,
refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm,
refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

³⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm,
refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm,
refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

³⁾ Data of vertical motors (IM V1) on request.

⁴⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm,
refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm,
refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SG7 series. For the 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

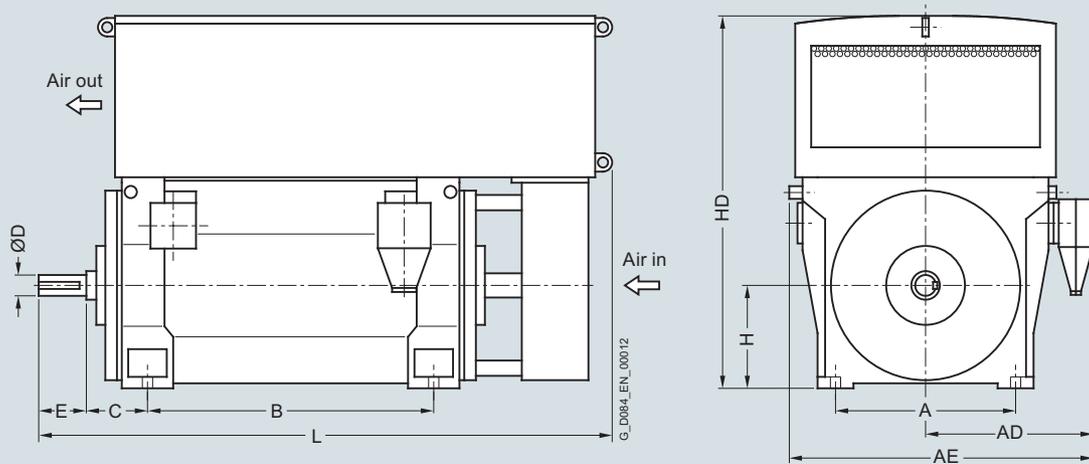

³⁾ Including air inlet silencer.

1) External fan for shaft height 630.

2) External fan for shaft heights 710, 800.

3)

Shaft height	Frequency	Number of poles	Fan dimension
630	50 Hz	2, 4, 8, 10, 12	570 mm
		6	500 mm
	60 Hz	2, 4	620 mm
		6, 8, 10, 12	570 mm
710	50 Hz	2, 4, 6	570 mm
		8, 10	500 mm
	60 Hz	2, 4, 6	620 mm
		8, 10	570 mm
800	50 Hz	4	570 mm
		6, 8	500 mm
	60 Hz	4	620 mm
		6, 8	570 mm

4) The dimensions are also valid for the 1SG7 series. For the 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

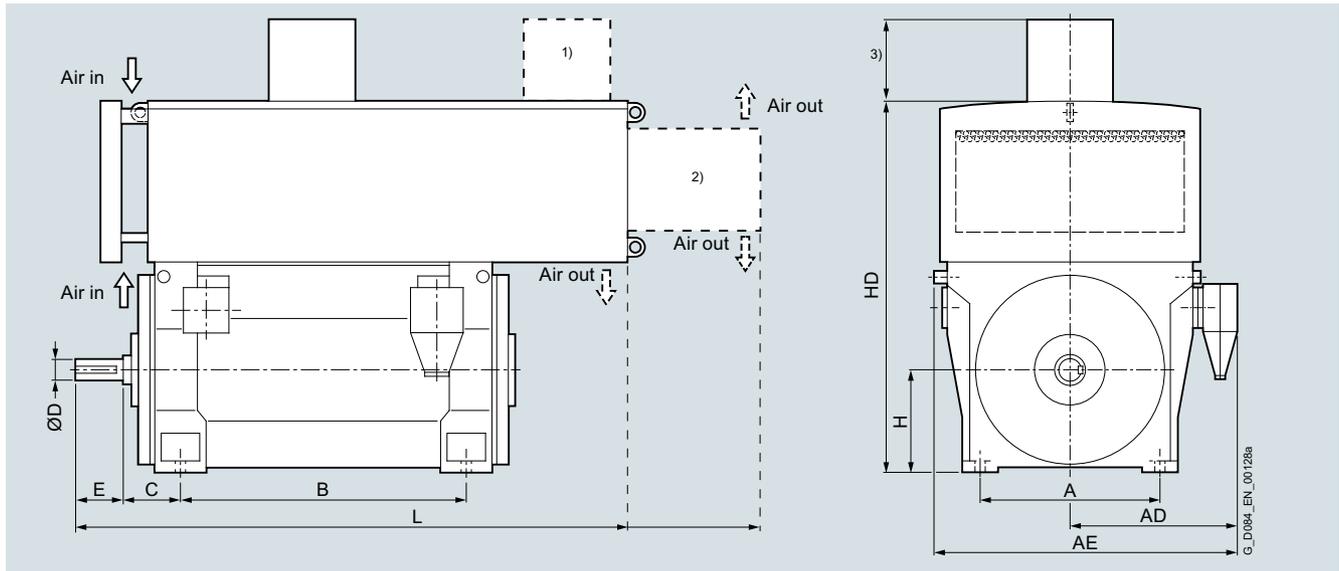

5) The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

1) External fan for shaft height 630.

2) External fan for shaft heights 710, 800.

3)

Shaft height	Frequency	Number of poles	Fan dimension
630	50 Hz	2, 4, 8, 10, 12	570 mm
		6	500 mm
	60 Hz	2, 4	620 mm
		6, 8, 10, 12	570 mm
710	50 Hz	2, 4, 6	570 mm
		8, 10	500 mm
	60 Hz	2, 4, 6	620 mm
		8, 10	570 mm
800	50 Hz	4	570 mm
		6, 8	500 mm
	60 Hz	4	620 mm
		6, 8	570 mm

4) The dimensions are also valid for the 1SG7 series. For the 1SB7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm, AE + 300 mm. Detailed drawings are available on request.

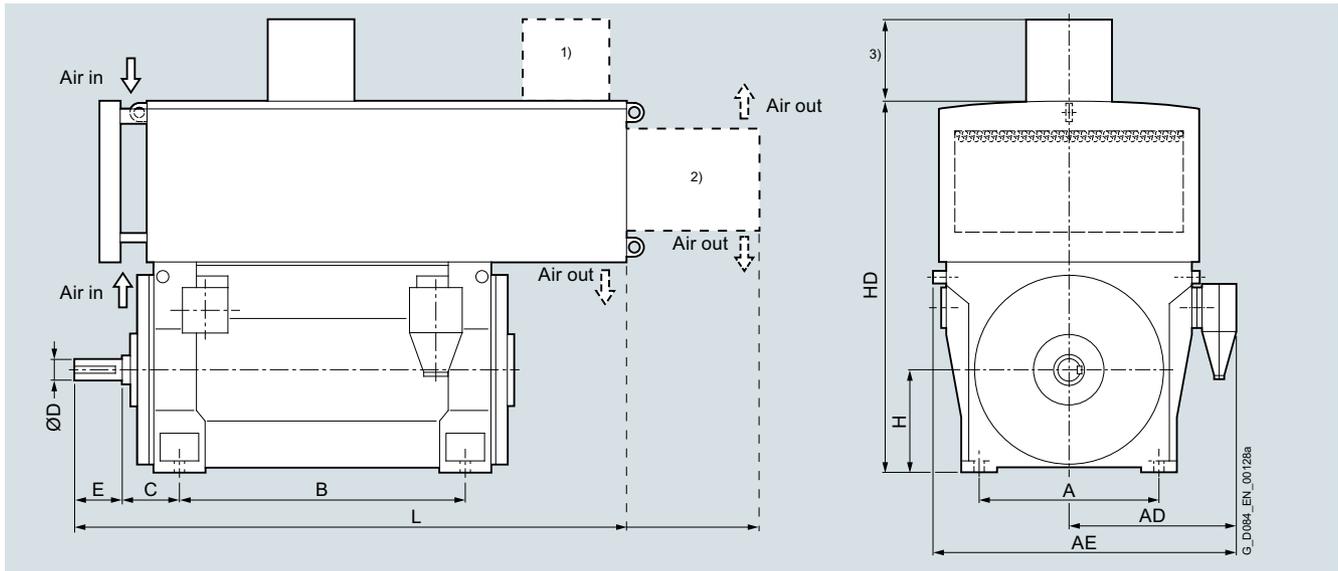

5) The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

Water-cooled motors · SIMOTICS HV M 1RN6, 1RN7

Overview

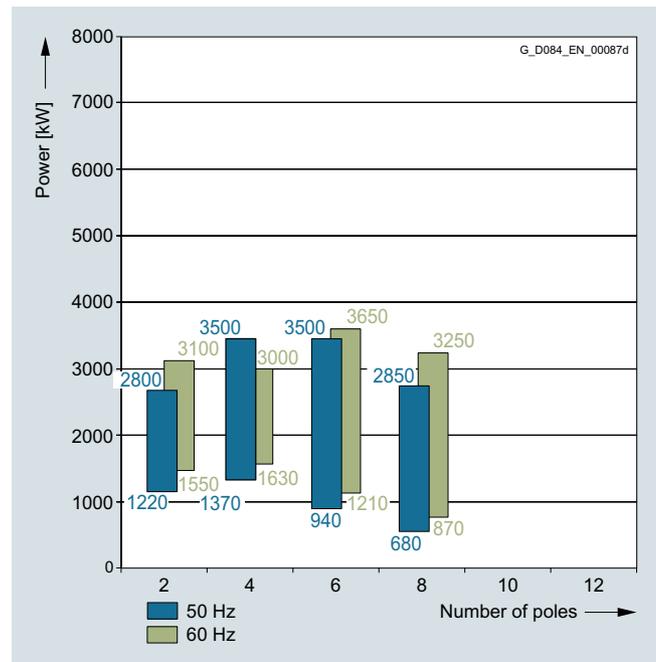

Power ranges for IEC motors with reinforced insulation for operation with SINAMICS converters without sine-wave filter

1RN6, 1SL6 (Ex ec) and 1SQ6 (Ex pxb) series

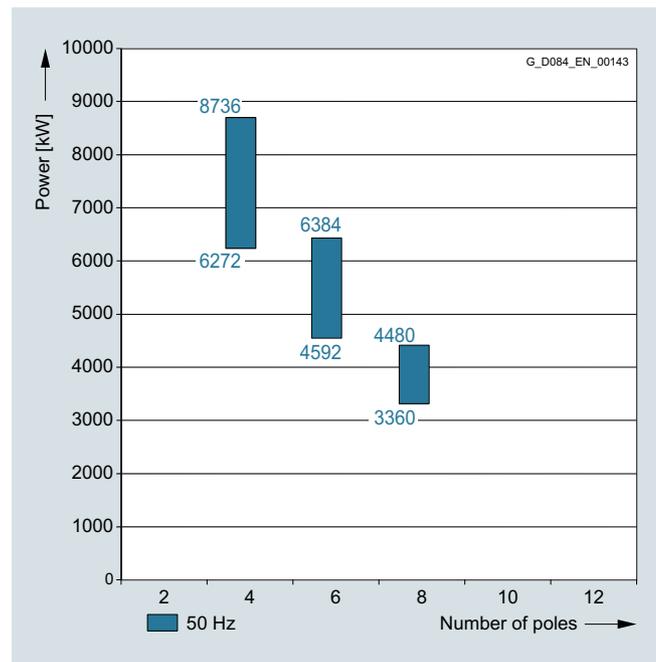

1RN7, 1SL7 (Ex ec) and 1SQ7 (Ex pxb) series

Insulation system, thermal class 155 (F)

The power data listed here apply for a water inlet temperature of 25 °C and an installation altitude ≤ 1000 m.

690 V; 50 Hz and 60 Hz

3.3 kV; 50 Hz

Technical data

Overview of technical data

SIMOTICS HV M 1RN6, 1RN7	
Rated voltage	690 V ... 10 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC81W/IC86W
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 900 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 800 mm	Housing: Steel Cooling enclosure: Steel

The following versions can be offered on request:

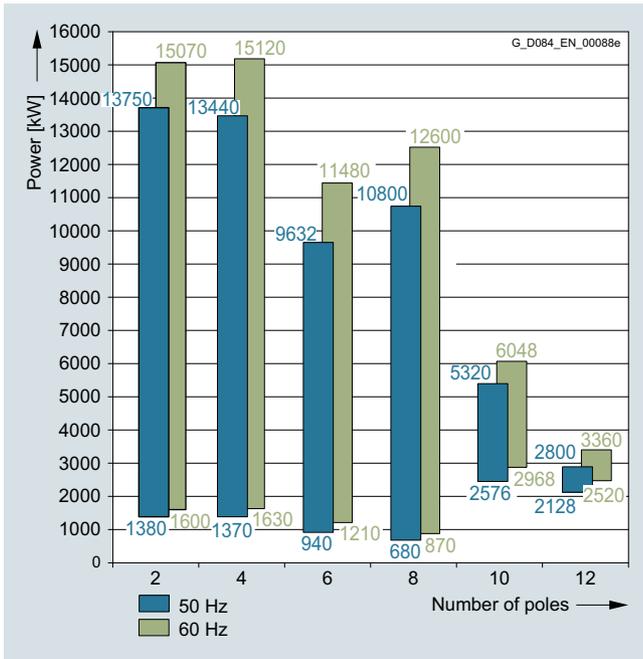

- 2-pole up to 75 Hz
- 4-pole up to 100 Hz
- 6-pole up to 90 Hz

For individual motor types, it must be ensured that the motor does not run-through any critical speed in the required speed control range and that the maximum speed does not exceed the mechanical speed limit of the motor! Please contact your Siemens sales partner regarding this check. The motor types are marked with footnotes in the following data tables.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

³⁾ There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

⁴⁾ Different number of parallel winding systems possible.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

³⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm,
refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm,
refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

Higher pole numbers are available on request.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

³⁾ Data of vertical motors (IM V1) on request.

⁴⁾ Utilization 130 (B) on request.

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm, refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm, refer to the article number structure on [page 1/5](#).

Note:

The motors for converter operation with non-sinusoidal output have, among other things, a reinforced winding insulation. Additional details [see page 3/2](#).

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

³⁾ Utilization 130 (B) on request.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SL7 series. For the 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

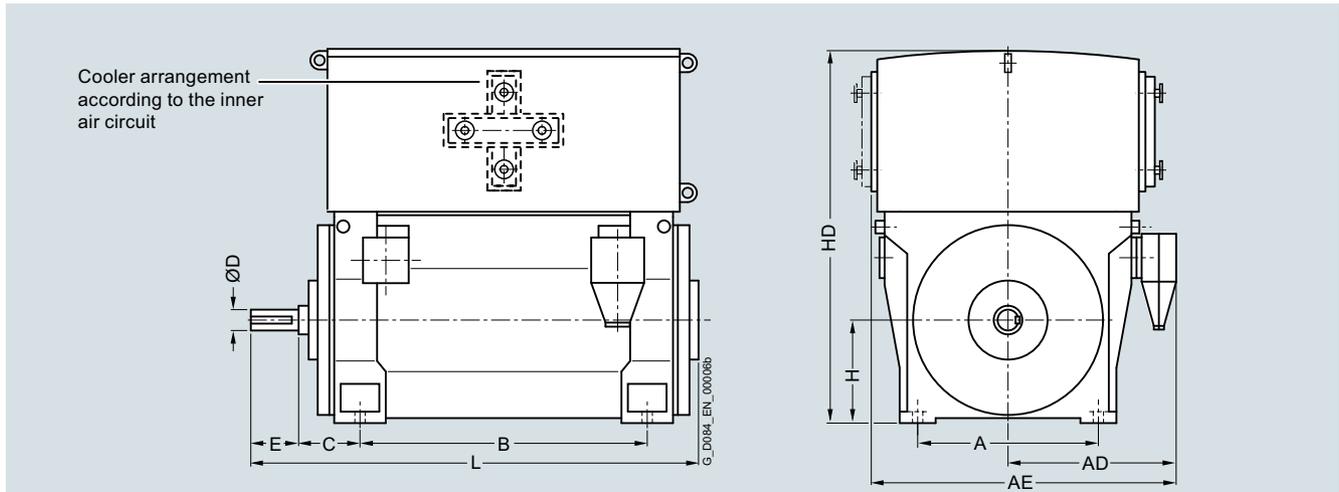

²⁾ The dimensions are also valid for the 1SL7 series. For the 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

1)

Shaft height	Frequency	Number of poles	Fan dimension
630	50 Hz	2, 4, 8, 10, 12	570 mm
		6	500 mm
	60 Hz	2, 4	620 mm
		6, 8, 10, 12	570 mm
710	50 Hz	2, 4, 6	570 mm
		8, 10	500 mm
	60 Hz	2, 4, 6	620 mm
		8, 10	570 mm
800	50 Hz	4	570 mm
		6, 8	500 mm
	60 Hz	4	620 mm
		6, 8	570 mm

2) The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

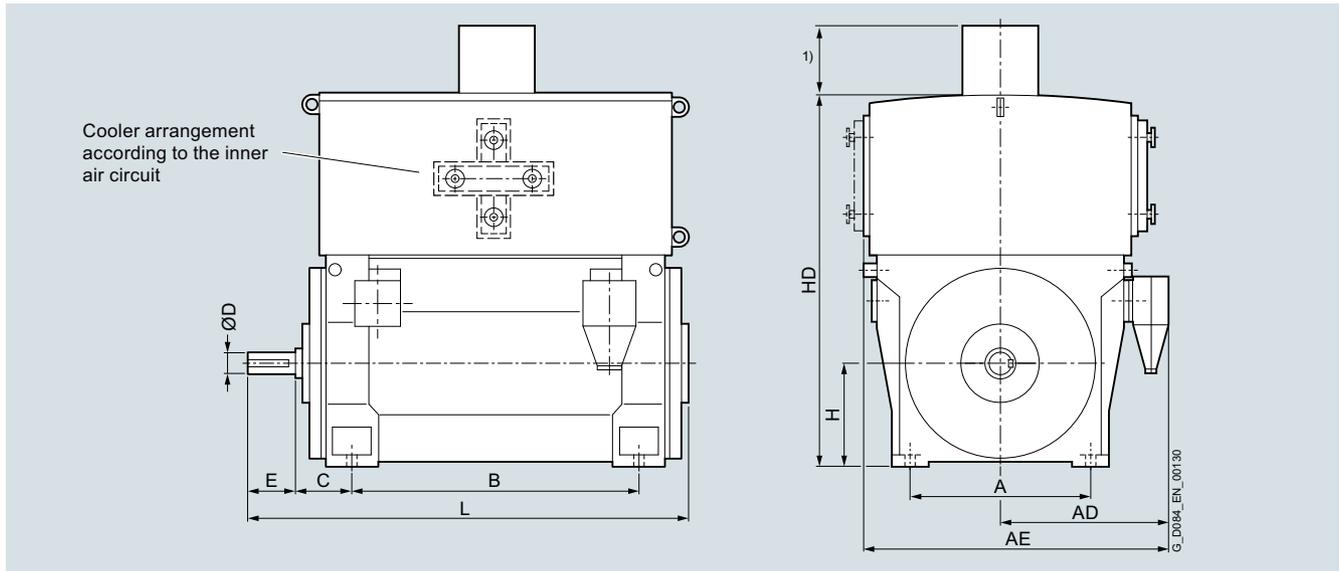

3) The dimensions are also valid for the 1SL7 series. For the 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

710	50 Hz	2, 4, 6	570 mm
		8, 10	500 mm
	60 Hz	2, 4, 6	620 mm
		8, 10	570 mm
800	50 Hz	4	570 mm
		6, 8	500 mm
	60 Hz	4	620 mm
		6, 8	570 mm

2) The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

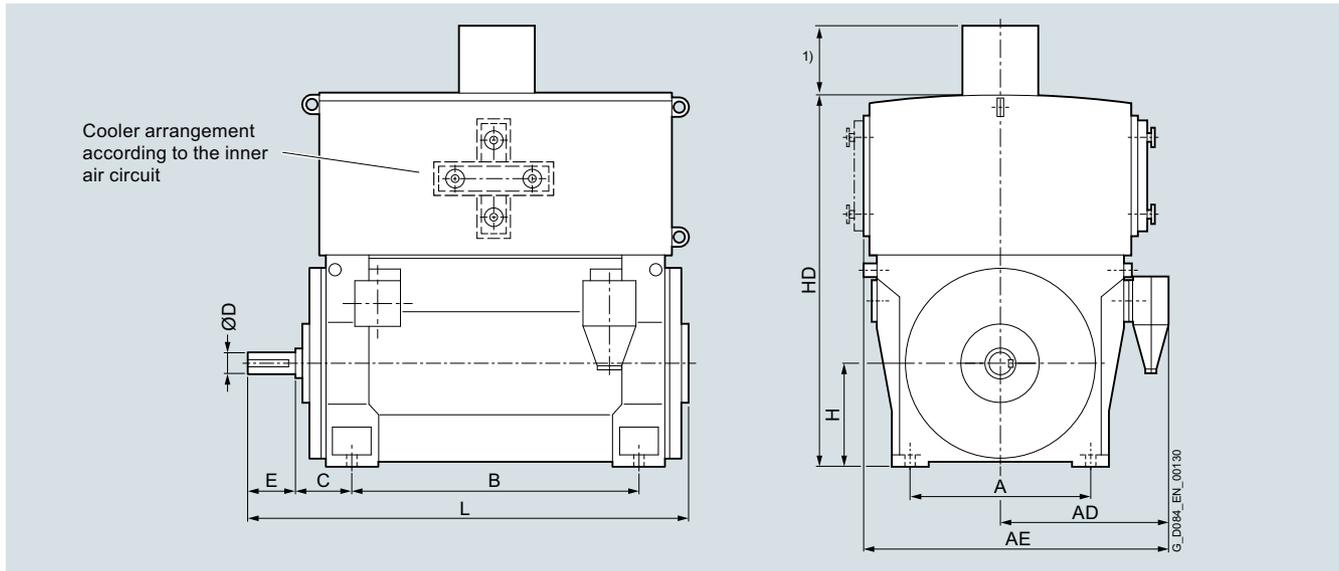

3) The dimensions are also valid for the 1SL7 series. For the 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

Overview

Technical data

Overview of technical data

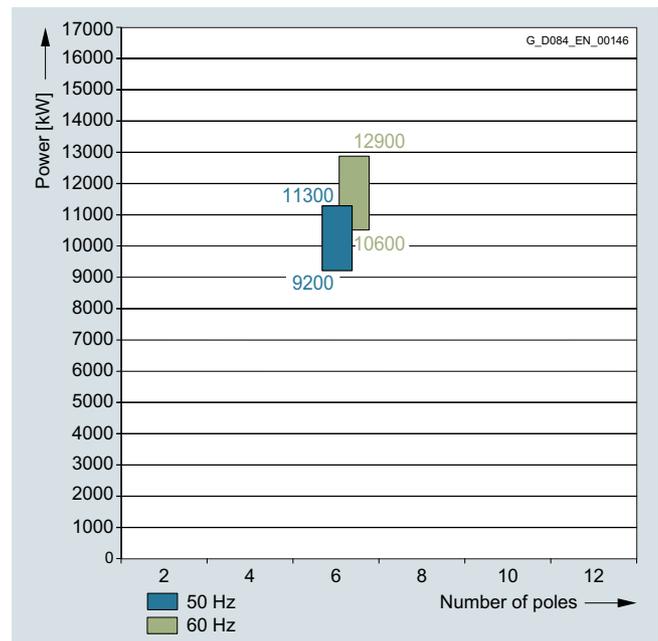

SIMOTICS HV M 1RQ7 constant-torque drive	
Rated voltage	6 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC611/IC616/IC666
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	800 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 800 mm	Housing: Steel Cooling enclosure: Steel

Power ranges for IEC motors for operation with SINAMICS converters with sinusoidal output

1RQ7, 1SG7 (Ex ec) and 1SB7 (Ex pxb) series

Insulation system, thermal class 155 (F)

The power data listed here apply for an ambient temperature of 40 °C and an installation altitude 1000 m.

Up to 6.6 kV; 50 and 60 Hz

Overview

Technical data

Overview of technical data

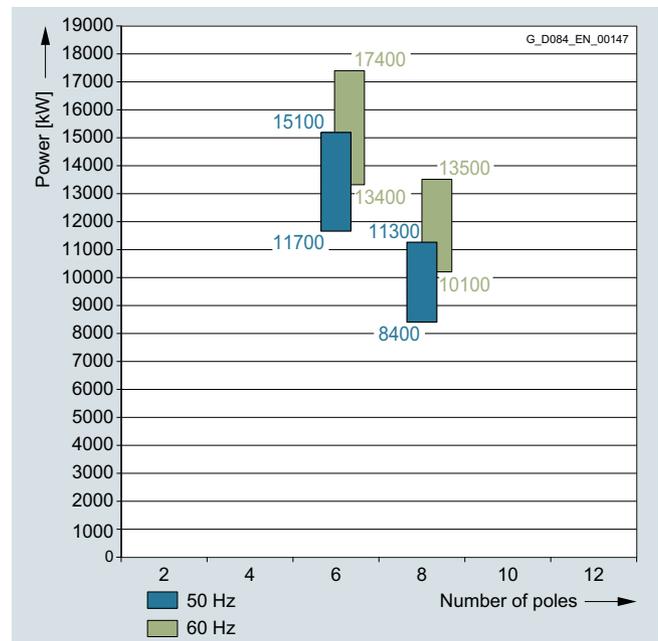

SIMOTICS HV M 1RN7 constant-torque	
Rated voltage	6 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC86W
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	800 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 800 mm	Housing: Steel Cooling enclosure: Steel

Power ranges for IEC motors for operation with SINAMICS converters with sinusoidal output

1RN7, 1SL7 (Ex ec) and 1SQ7 (Ex pxb) series

Insulation system, thermal class 155 (F)

The power data listed here apply for a water inlet temperature of 25 °C and an installation altitude ≤ 1000 m.

Up to 6.6 kV; 50 Hz and 60 Hz

Motors for subcritical operation

General information

Subcritical motors

Overview

Some applications require that a motor is operated over the complete speed range or at least over a significantly wider speed range. For example, this is the case for many pump and compressor drives.

However, especially for 2-pole motors, the critical speed lies below the rated speed of 3000 rpm (at 50 Hz). It is not permissible that the motors are operated in the range around the critical speed. This means that the motor must quickly pass through this range below the rated speed.

Based on a clever design, the critical speed of "subcritical motors" lies above the rated speed, which means that the motor can be operated across its complete speed range. As standard, SIMOTICS HV M motors with 4 poles and higher are always subcritical. This is not always the case for 2-pole motors.

Subcritical motors specifically designed for the applications listed above can be identified in the following tables as a result of the uneven digits from 1 to 5 at the seventh position of the article number (length).

Position ■ of the Article No.

For shaft heights 450 mm to 560 mm,
refer to the article number structure on [page 1/3](#).

For shaft heights 630 mm to 900 mm,
refer to the article number structure on [page 1/5](#).

Note:

Ratings are defined for sinusoidal supply, based on IEC 60034-2-1:2007.

The ratings for converter operation depend on the converter and its settings and cannot be predetermined.

¹⁾ Standard values; higher speed limits on request.

²⁾ Data of vertical motors (IM V1) on request.

³⁾ There are speed exclusion ranges for this type. It must be ensured that the motors are not continuously operated in these speed ranges. The exclusion ranges must be clarified in advance in the factory.

⁴⁾ Different number of parallel winding systems possible.

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RN6, 1RN7	
Rated voltage	6 kV ... 10 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC81W/IC86W
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 630 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 800 mm	Housing: Steel Cooling enclosure: Steel

Technical data (continued)

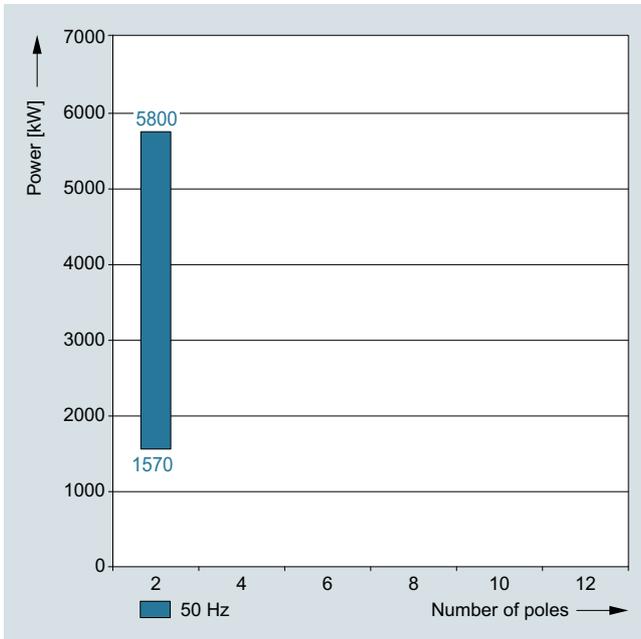

Power ranges for IEC motors with reinforced insulation for operation with SINAMICS converters without sine-wave filter

1RN6, 1SL6 (Ex ec) and 1SQ6 (Ex pxb) series

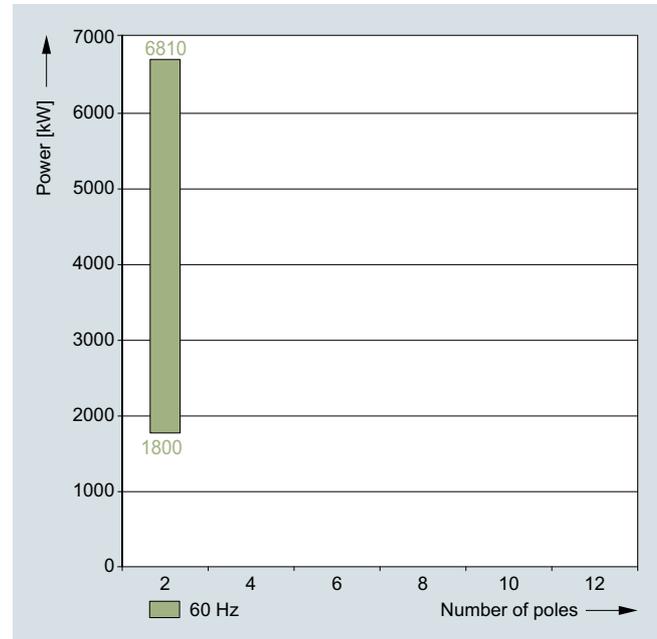

1RN7, 1SL7 (Ex ec) and 1SQ7 (Ex pxb) series

Insulation system, thermal class 155 (F)

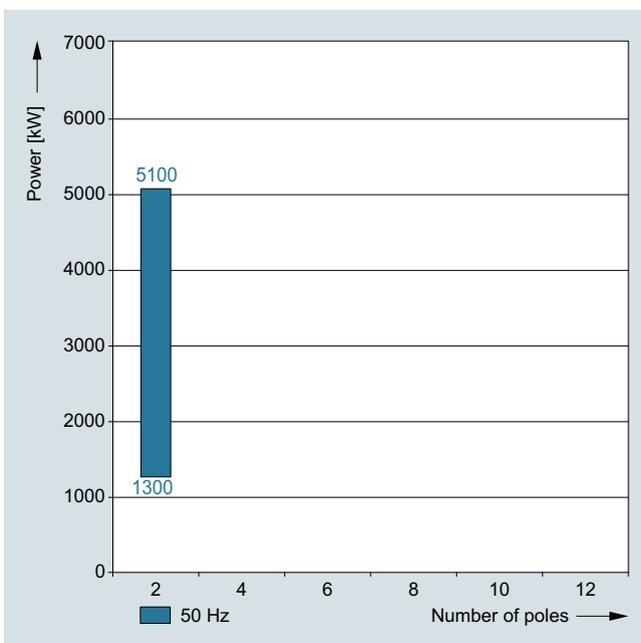

The power data listed here apply for a water inlet temperature of 25 °C and an installation altitude ≤ 1000 m.

6 kV; 50 Hz

6.6 kV; 60 Hz

10 kV; 50 Hz

1RN6565-2	7950	1060	1205	1975	1400	475	130	200	560	2150	2550
1RN7631-2NA60-0CJ0	9700	1320	1340	2340	1600	475	150	200	630	2170	2630
1RN7633-2NA60-0CJ0	10000	1320	1340	2340	1600	475	150	200	630	2170	2630

Note:

Higher pole numbers are available on request.

¹⁾ The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

²⁾ The dimensions are also valid for the 1SL6 and 1SL7 series. For the 1SQ6 and 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

Dimension drawings

Motor type	Weight kg	Dimensions									
		A mm	AD ²⁾ mm	AE ²⁾ mm	B mm	C mm	D mm	E mm	H mm	HD ⁴⁾ mm	L mm
Up to 6.6 kV, IM B3 type of construction, sleeve bearings – 1RN7³⁾ series – IC86W											
2-pole											
1RN7631-2PA60-0CJ0	10200	1320	1340	2340	1600	475	150	200	630	2610	2630
1RN7633-2PA60-0CJ0	10500	1320	1340	2340	1600	475	150	200	630	2610	2630

Note:

Higher pole numbers are available on request.

1) Shaft height	Frequency	Number of poles	Fan dimension
630	50 Hz	2	570 mm
	60 Hz	2	620 mm

2) The values apply to 6 kV. When a lower voltage is selected, the rated current increases. For rated voltages from 2.0 kV to 6.6 kV and rated currents > 400 A, the dimension increases by 140 mm.

3) The dimensions are also valid for the 1SL6 and 1SL7 series. For the 1SQ6 and 1SQ7 series, the dimensions might change as follows due to the required purging system: HD + 400 mm. Detailed drawings are available on request.

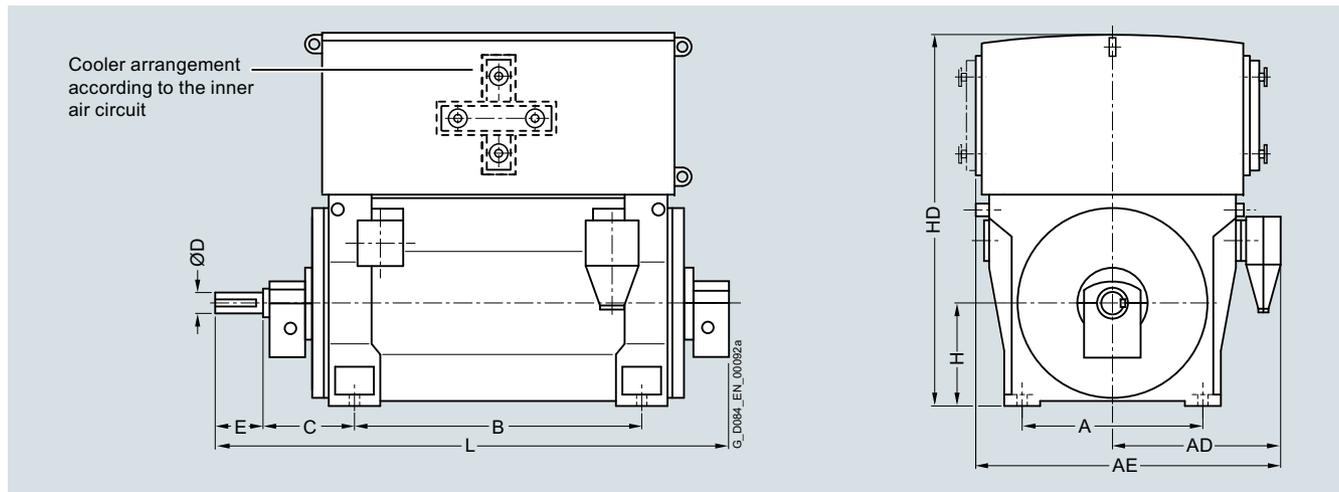

4) For the 60 Hz version, sleeve bearings are standard, "-Z K96" not necessary.

Motors for subcritical operation

Motors for converter operation

Converter with sinusoidal output > Air-cooled motors SIMOTICS HV M 1RQ6, 1RQ7 constant-torque drive

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RQ6 constant-torque drive	
Rated voltage	6 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC611/IC616/IC666
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 630 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 800 mm	Housing: Steel Cooling enclosure: Steel

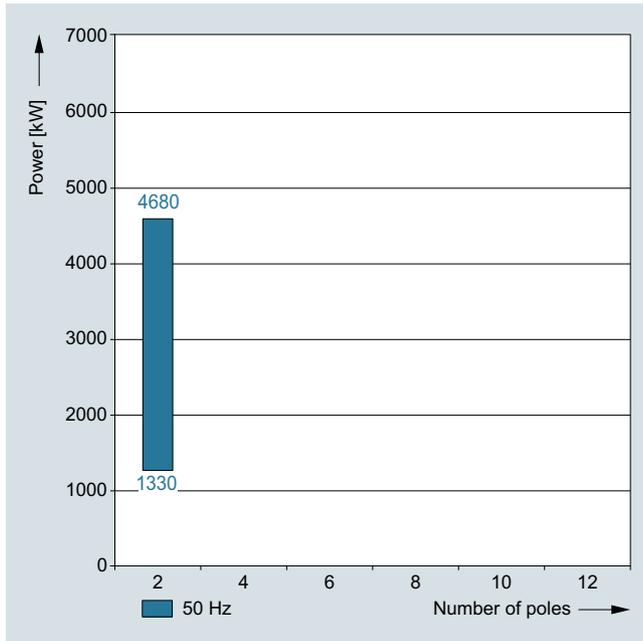

Technical data

Power ranges for IEC motors for operation with SINAMICS converters with sinusoidal output

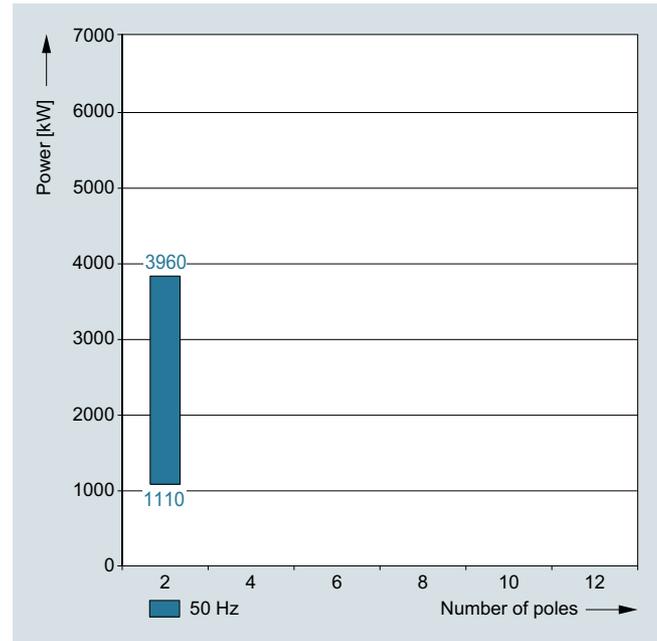

1RQ7, 1SG7 (Ex ec) and 1SB7 (Ex pxb) series

Insulation system, thermal class 155 (F)

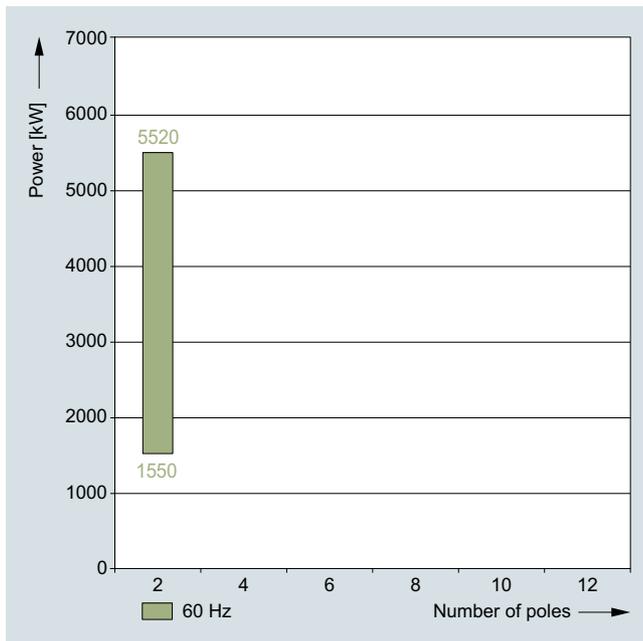

The power data listed here apply for an ambient temperature of 40 °C and an installation altitude 1000 m.

6 kV; 50 Hz

10 kV; 50 Hz

6.6 kV; 60 Hz

Motors for subcritical operation

Motors for converter operation

Converter with sinusoidal output > Air-cooled motors SIMOTICS HV M 1RQ6, 1RQ7 constant-torque drive

Selection and ordering data

Note:

For dimension drawings, refer to section "Converter with non-sinusoidal output".

Motors for subcritical operation

Motors for converter operation

Converter with sinusoidal output > Water-cooled motors SIMOTICS HV M 1RN6, 1RN7 constant-torque drive

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1RN7 constant-torque	
Rated voltage	6 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Cooling method	IC86W
Stator winding insulation	Insulation system, thermal class 155 (F)
Shaft height	450 ... 630 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 800 mm	Housing: Steel Cooling enclosure: Steel

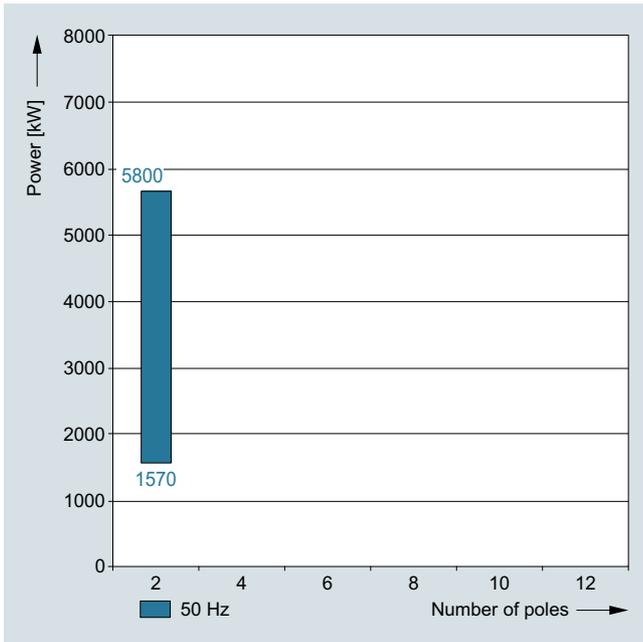

Power ranges for IEC motors for operation with SINAMICS converters with sinusoidal output

1RN7, 1SL7 (Ex ec) and 1SQ7 (Ex pxb) series

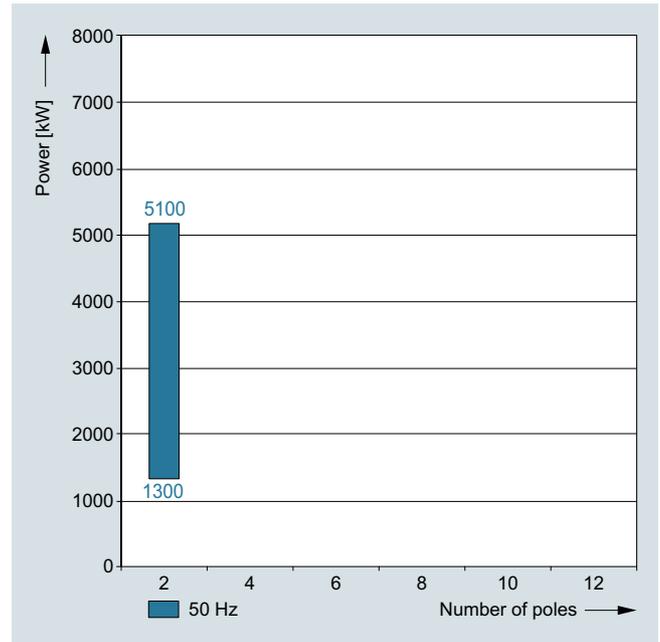

Insulation system, thermal class 155 (F)

The power data listed here apply for a water inlet temperature of 25 °C and an installation altitude ≤ 1000 m.

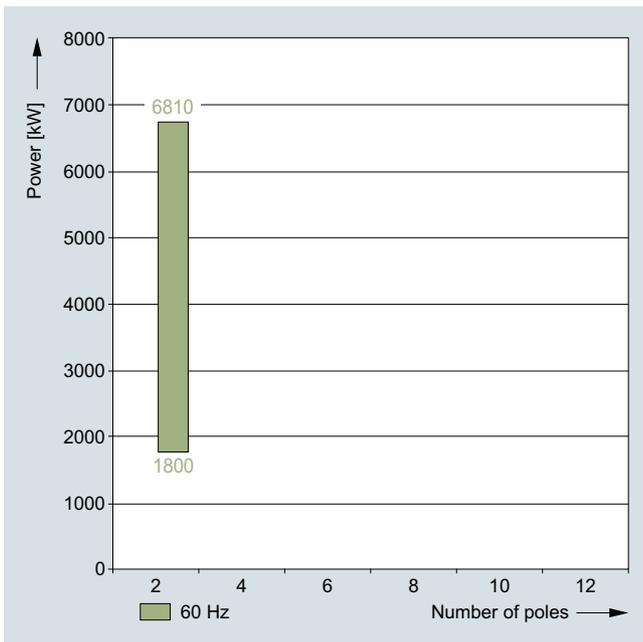

Technical data

6 kV; 50 Hz

10 kV; 50 Hz

6.6 kV; 60 Hz

Motors for subcritical operation

Motors for converter operation

Converter with sinusoidal output > Water-cooled motors SIMOTICS HV M 1RN6, 1RN7 constant-torque drive

Selection and ordering data

The following data also apply to explosion-protected motors 1SL7 (Ex ec) and 1SQ7 (Ex pxb).

Explosion-protected motors

Overview

Classification of zones

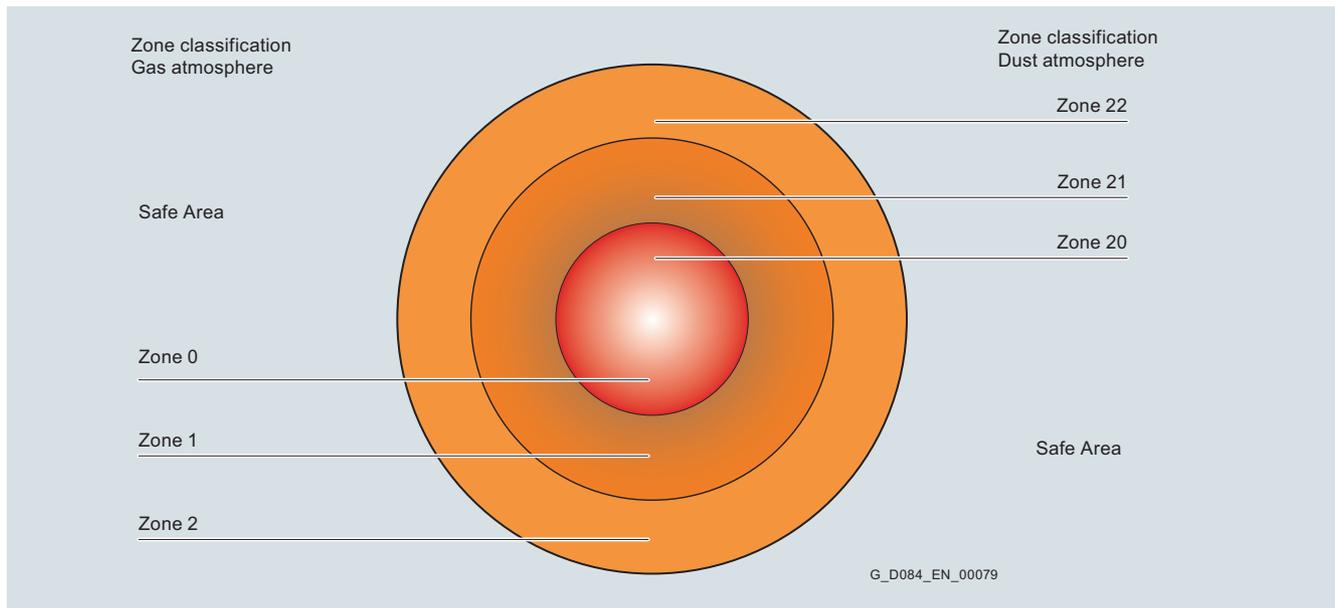

Overview

In many industries, manufacturing, processing, transportation or storing of combustible materials result in creation or release of gas, vapor or mist into the environment. Combustible dusts are created in other processes.

Explosive atmospheres result from contact of gases, vapors, mist or dust with oxygen in the air. If ignited, this can result in an explosion. In the chemical and petrochemical industries in particular, when crude oil and natural gas are transported, or in mining, milling (e.g. grain and granular solids), this can result in serious injury to personnel and damage to equipment.

To ensure maximum safety in these areas, legislators in most countries have implemented appropriate stipulations in the form of laws and regulations based on national and international standards.

Hazardous areas are classified in zones. Classification in zones depends on the probability of the presence of an explosive atmosphere, the duration and the location. Information and specifications regarding classification in zones are provided in IEC/EN 60079-10-1 for gas atmospheres and in IEC/EN 60079-10-2 for potentially explosive atmospheres as a result of dust. Further, a distinction is made between various explosion groups as well as temperature classes and these are included in the hazard assessment.

Depending on the particular zone and therefore the associated hazard, operating equipment must comply with defined minimum requirements regarding the type of protection. The different

types of protection require corresponding measures to prevent ignition that should be implemented at the motor in order to prevent that a surrounding explosive atmosphere is ignited.

Zone Dust ²⁾	Gas ¹⁾²⁾	Zone definition acc. to IEC/EN 60079-10-1 for Gas atmospheres IEC/EN 60079-10-2 for dust atmospheres	Assigned types of protection	Category according to 94/9/EC
22	–	An area in which in normal operation it is not expected that an explosive atmosphere in the form of a cloud of combustible dust in the air occurs, and if it does occur then only briefly.	Ex tc	3D
–	2	An area in which in normal operation it is not expected that an explosive gas atmosphere occurs and if so, only infrequently and only briefly.	Ex ec	3G
–	1	An area in which it is expected that an explosive gas atmosphere occurs during normal operation.	Ex eb Ex pxb Ex db	2G
–	0	An area in which it is expected that a gas atmosphere is constantly present or for long periods of time	Motors are not permitted	

Note:

Referring to the 60079 IEC/EN standards, the following should be observed:

- The previous Ex e and Ex nA markings have been changed to Ex eb and Ex ec respectively. For both, the associated standard is IEC/EN 60079-7:2015. Expiration date of old marking: 2018-07-31
- The previous Ex px marking has been changed to Ex pxb. The associated standard is IEC/EN 60079-2:2014. Expiration date of old marking: 2017-08-25

¹⁾ Motors for Zone 1 may also be used in Zone 2.

²⁾ Motors, which are marked for gas or dust protection, must not be used in hybrid mixtures! Hybrid mixtures: When explosive gas and dust atmospheres occur simultaneously.

Overview

Type of protection, pressurized enclosure *Ex pxb* acc. to IEC/EN 60079-2

In the motor, protective gas is kept under pressure in relation to the surrounding atmosphere to prevent the penetration of explosive atmospheres. The inside of the motor must be flushed with a protective gas before it is switched on.

The terminal box is included in the pressurized enclosure or has increased safety (type of protection *Ex eb*).

For motors > 11 kV, the terminal box is always included in the pressurized enclosure.

SIMOTICS HV M motors (air-cooled, type series 1SB6/1SB7 and water-cooled, type series 1SQ6/1SQ7) fulfill this type of protection.

Type of protection, *Ex ec* acc. to IEC/EN 60079-7

The type of protection ***Ex ec*** ensures that a motor in normal operation as well as when operated under deviating conditions as specified in the standard is not in a position to ignite a surrounding explosive gas atmosphere.

The series of SIMOTICS HV M motors (air-cooled, type series 1SG6/1SG7 and water-cooled, type series 1SL6/1SL7) are available in ***Ex ec***.

Type of protection *Ex t* acc. to IEC/EN 60079-31

This type of protection applies for electrical equipment protected using an enclosure and with limited surface temperature for use in areas in which combustible dust can occur in concentration levels that could cause a fire or an explosion.

The series of SIMOTICS HV M motors (air-cooled, type series 1SG6/1SG7 and water-cooled, type series 1SL6/1SL7) are available in ***Ex tc***.

Explosion-protected motors for converter operation

Principally, explosion-protected motors can be fed from drive converters. As a result of the different design, system analyses, system tests etc. for the various types of protection, an inquiry is required to check whether these motors can be actually implemented.

Explosion-protected motors

Overview

Certification

Overview (continued)

Certification

Motors for use in hazardous areas are certified according to the EC Directive 94/9/EC (ATEX) or other regional certification schemes and are marked according to the following schematic.

Example, pressurized enclosure:	Acc. to Directive 94/9/EC (ATEX)						Acc. to Standards (IEC/EN)				
	CE	XXXX	⊕x	II	2	G	Ex	pxb	II	T3	X
CE marking											
Number of the certifying "notified body"											
Ex symbol for explosion protected equipment											
Groups:											
• I = mining											
• II = other than mining											
Category:											
• 2 (Zone 1/21)											
• 3 (Zone 2/22)											
Explosive atmosphere											
• G = gas											
• D = dust											
Explosion protected equipment											
Type of protection db, eb, ec, pxb, tc											
Note: Additional types of protection for accessories are alphabetically listed											
Explosion group, where relevant, restricted (Gas: IIA, IIB, IIC; Dust: IIIA, IIIB, IIIC)											
Temperature class with max. surface temperature											
• T1 ≤ 450 °C											
• T2 ≤ 300 °C											
• T3 ≤ 200 °C											
• T4 ≤ 135 °C											
Alternatively the maximum surface temperature may be marked: e.g. T125 °C (possible for gas, necessary for dust explosion protected machines)											
Special conditions according to the operating instructions or type examination certificate

Overview

Technical data

Overview of technical data

SIMOTICS HV M 1SG6/SG7	
Rated voltage	3.3 ... 11 kV
Rated frequency	50/60 Hz
Motor type	Induction motor with squirrel-cage rotor
Type of construction	IM B3, IM V1
Degree of protection	IP55
Type of protection	Ex ec/Ex tc
Operation in hazardous areas	Zone 2/Zone 22
Cooling method	IC611/IC616/IC666
Stator winding insulation	Thermal class 155 (F), utilized to 130 (B)
Shaft height	450 ... 800 mm
Bearings	Anti-friction bearings, sleeve bearings
Cage material	Copper
Standards	IEC, EN (NEMA version on request)
Frame design for shaft heights 450 ... 560 mm	Housing: Cast iron Cooling enclosure: Steel
Frame design for shaft heights 630 ... 800 mm	Housing: Steel Cooling enclosure: Steel

SIMOTICS HV M motors (type series 1SG6 and 1SG7) developed for Zone 2 in type of protection **Ex ec** or for Zone 22 in type of protection **Ex tc** are available as modular motors with air/air heat exchanger. The Article No. schematic is shown in Chapter 1.

These **Ex ec** or **Ex tc** measures do not affect the performance data or main dimensions with respect to SIMOTICS HV M motors. This is the reason that the values of the 1RQ6 or 1RQ7 type series from Chapter 2 can be used for 1SG6 and 1SG7 motors.

An extensive range of options and tests are available for SIMOTICS HV M motors, type of protection **Ex ec** or **Ex tc** (--> Options and tests).

Description of options

Options and tests

Description of options

Overview

Using the following options, SIMOTICS HV M can be adapted to order-specific requirements. The Article No. is supplemented with a "-Z" and with either one or several order codes.

Example: **1RN7710-2NA60-0CJ0-Z H05 + K16 + L20**

As standard, 6 x Pt100 slot resistance thermometers without surge arrester for 3-wire or 4-wire circuit from the terminal box are integrated in the stator winding.

The motors are prepared as standard with SPM nipples to monitor the anti-friction bearings.

Options for marine and offshore applications

Orientation

Overview

The SIMOTICS HV series in a marine design have been designed for below-deck operation on ships. If the motors are intended for on deck operation or for offshore applications, then these must be explicitly ordered using an additional order code. The reason for this is that in these cases special measures are required.

The thermal utilization of the motors is adapted to the generally higher ambient temperatures onboard ships. If the application demands compliance with additional regulations, such as explosion protection, the appropriate motor series must be chosen.

The motors onboard ships are subdivided into three importance categories by the marine classification societies in collaboration with customers, depending on the field of application:

- **Essential Service for Propulsion** or also Primary Essential Service
- **Essential Service** or also Secondary Essential Service or Important Service
- **Non-Essential Service** or also Non-Important Service

As the assignment of a drive to one of the importance categories has a direct impact on the scope of the marine options, this must be known when ordering the motor.

The following services of the motor manufacturer are associated with the categories:

	Importance category		
	Essential Service for Propulsion	Essential Service	Non-Essential Service
Typical applications	Propeller drive, thruster (if used as main drive/declared as propulsion)	Thrusters, lateral thrust units, anchor winches, bilge and ballast pumps, fire-fighting pumps	Pumps for service water
Version	In accordance with the regulations of the classification society		In accordance with ambient conditions of the classification society
Acceptance test certificate	Acceptance test certificate 3.2 according to EN10204		Acceptance test certificate 3.1 according to EN 10204 ¹⁾
Individual acceptance by classification society	Will be performed. Motor is assigned an individual certificate of the classification society.		Not necessary
Ordering several identical motors	Differentiation between the first motor and additional ones must be realized when ordering using an order code.		No distinction
Rating plate data	Information about ambient conditions of the classification society		
Stamp of the classification society	Stamp on the shaft ²⁾ and enclosure		No stamp

Classification authorities

Society	Abbreviation	Location
American Bureau Of Shipping	ABS	USA
Bureau Veritas	BV	France
China Classification Society	CCS	China
Det Norske Veritas Germanischer Lloyd	DNV GL	Norway
Korean Register	KR	Korea
Lloyds Register	LR	UK

¹⁾ Certificate is not stipulated by the classification society but it is issued according to the internal quality standards within the scope of a routine test.

²⁾ Provided that it is specified that the classification society supervises construction.

Benefits

The marine motors offer the user a number of advantages and benefits:

- Cast iron and steel versions can be supplied for corrosive atmospheres especially for high humidity levels and salt laden air
- Increased corrosion protection using specially designed paint finishes is available
- Certified marine motors can be supplied for use in areas to be protected against explosion
- In depth know-how regarding customer requirements
- Worldwide service network with 24-hour service hotline for motors and converters

Application

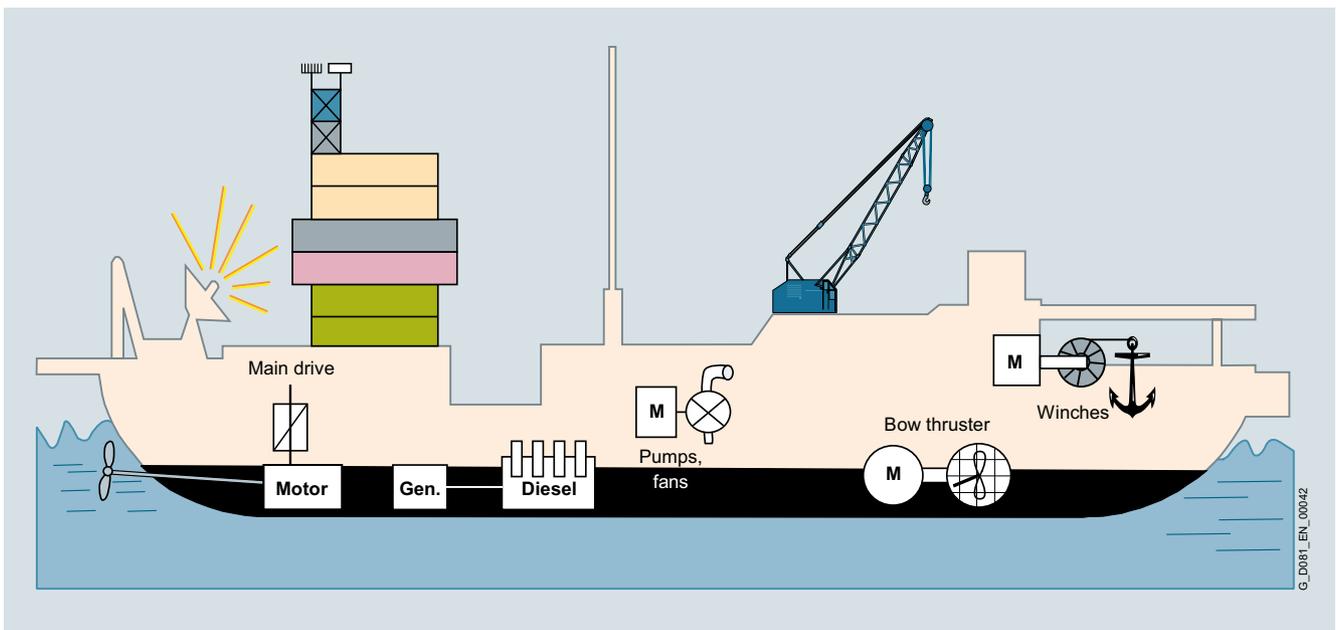

Our marine motors are designed for use onboard ships (installed below deck or on deck under a protective canopy):

- Applications onboard ships as main and auxiliary drives below deck, e.g.:
 - Fans (air conditioning, refrigeration plants)
 - Pumps (for fire-extinguishing water, fuels, oils)
 - Winches (anchor winches, warping winches, lifting gear)
 - Compressors
 - Bow thruster drives
 - Main propulsion drives
 - Ex motors for hazardous zones

If marine motors are to be used on deck in especially corrosive atmospheres or in offshore applications, then they must be additionally upgraded to meet these more stringent conditions. For this purpose, one of the options E81, E82 or E83 should be selected.

- Typical applications are:
 - Coastal areas, e.g. oil rigs, drilling ships
 - Dynamic positioning drives for platforms
 - Pumps

Offshore versions must be specifically ordered, as they require special measures.

Typical areas of application

Options for marine and offshore applications

Orientation

Technical data

Enclosure version

Depending on the motor series, motors are available in a corrosion-resistant steel enclosure or in a rugged low-vibration cast-iron version.

Regulations of the individual classifications societies for motors:

Classification society	Coolant temperature CT		Admissible temperature rise limit according to the classification society			Rated power limit for individual acceptance test kW	Construction supervision mandatory
	Water cooling °C	Air cooling °C	Temperature class 130 (B) K	155 (F), $P_{\text{rated}} < 5000 \text{ kW}$ K	155 (F), $P_{\text{rated}} \geq 5000 \text{ kW}$ K		
LR	32	45	70	95	90	≥ 100	≥ 100 kW
BV	32	45	75	100	95	≥ 100	≥ 500 kW
DNV GL	32	45	75	100	100	≥ 300	–
ABS	32	50	70	95	90	≥ 100	–
KR	32	45	75	100	95	≥ 7.5	–
CCS	32	45	75	100	95	All power ratings	All power ratings

Motor connection

Cable glands are not included in the scope of delivery.

All marine motors generally have an external grounding terminal.

Technical data (continued)

Regulations of the individual classification societies with order codes when ordering SIMOTICS HV M motors in a marine design

SIMOTICS HV M in a marine design

Cooling method	SIMOTICS HV M motor series
Water-cooled motors for line and converter operation	1RN6, 1RN7
Air-cooled motors for line and converter operation (self-ventilated)	1RQ6, 1RQ7
Air-cooled motors with externally mounted fan for converter operation	1RQ6, 1RQ7
Motors with the cooling types listed above with type of protection "ec" or "tc" (Zone 2 or Zone 22)	1SL6, 1SL7 1SG6, 1SG7
Motors with the cooling types listed above with type of protection "pxb" (Zone 1)	1SQ6, 1SQ7 1SB6, 1SB7

SIMOTICS HV M motors for marine applications must be ordered with the classification-specific options. This ensures that both the mechanical design of the motor, and the tests are performed exactly in accordance with the instructions provided by the respective classification society.

There are four categories of classification-specific options:

- 1) *Design options* define the marine-compatible technical design in accordance with the definitions of the classification society
- 2) *Certification options* define the scope of the test certificates
- 3) *Test options* define the scope of the individual tests
- 4) *Additional options* for deviations and special conditions: specify the customer's request for participation in the tests at the factory, or define coolant temperatures that differ from the requirements of the classification society (additional plain text required)

The options of the importance categories listed above are combined with each other depending on the class of importance, classification society and other conditions.

If motors are to be designed according to the specifications of several classification societies, a special inquiry is necessary.

Motors for Non-Essential Services

The technical design is in accordance with the ambient operating conditions specified by the classification society. One of the marine design options X00, X01, X12¹⁾, X03, X05 or X06 must be specified depending on the classification society. Acceptance inspections are not required. There is no distinction between ordering an individual motor or several ones.

Non-Essential Service	Options according to the classification society					
	ABS	BV	CCS	DNV GL	KR	LR
Technical version	X00	X01	¹⁾	X03	X05	X06

Motors for Essential Services

The technical design is in accordance with regulations of the classification society: Options X10 to X16. An acceptance test certificate 3.2 according to EN 10204 and a product certificate of the classification society is provided with each motor. Depending on the classification society, the test steps are defined by options X30 to X42 for the first motor (even numbers) and X31 to X43 for the additional motors (uneven numbers). Options J70 to J82 or J71 to J83 define the expenditure for certifying the motor.

Essential Service	Options according to the classification society					
	ABS	BV	CCS	DNV GL	KR	LR
Technical version	X10	X11	X12	X13	X15	X16
Certification						
• First motor	J70	J72	J74	J76	J80	J82
• Additional motors	J71	J73	J75	J77	J81	J83
Scope of the tests and presence of representatives of the classification society						
• First motor	X30	X32	X34	X36	X40	X42
• Additional motors	X31	X33	X35	X37	X41	X43
Tests in presence of representatives of the customer (in addition to the inspector of the classification society)	X99					
Conditions deviating from classification requirements must be fulfilled	E80					

Motors for Essential Services for Propulsion

The technical design is in accordance with regulations of the classification society: Options X20 to X26. An acceptance test certificate 3.2 according to EN 10204 and a product certificate of the classification society is provided with each motor. Depending on the classification society, the test steps are defined by options X60 to X72 for the first motor (even numbers) and X61 to X73 for the additional motors (uneven numbers). Options N40 to N52, or N41 to N53 define the expenditure for certifying the motor.

Essential Service for Propulsion	Options according to the classification society					
	ABS	BV	CCS	DNV GL	KR	LR
Technical version	X20	X21	X22	X23	X25	X26
Certification						
• First motor	N40	N42	N44	N46	N50	N52
• Additional motors	N41	N43	N45	N47	N51	N53
Scope of the tests and presence of representatives of the classification society						
• First motor	X60	X62	X64	X66	X70	X72
• Additional motors	X61	X63	X65	X67	X71	X73
Tests in presence of representatives of the customer (in addition to the inspector of the classification society)	X99					
Conditions deviating from classification requirements must be fulfilled	E80					

Option E80 is used if a different coolant temperature CT is required. The CT must also be specified in plain text, e.g. CT55.

¹⁾ Non-Essential Service must be handled by CCS just like an Essential Service.

Options for marine and offshore applications

Orientation

Technical data (continued)

Scope of design options X00 to X26

All classification-specific technical measures are contained in the design options.

Temperature class and coolant temperature

Standard motors and explosion-protected motors up to shaft height 710 mm

In general, marine motors are designed for a coolant temperature CT 45 °C in temperature class 155 (F), used according to 155 (F). Motors according to the ABS classification that specify CT 50 °C are an exception. When motors are used according to temperature class 130 (B) derating is required.

Coolant temperatures that exceed CT 45 °C require derating in accordance with the following table:

	Coolant temperature CT			
	45 °C	50 °C	55 °C	60 °C
Temperature class 155 (F) according to 155 (F)				
Derating factor for line operation	1.00	0.95	0.90	0.85

More detailed information is available on request.

Rating plate and acceptance test certificate

The metal rating plate includes the data of the relevant classification society (exception: Non-Essential Services) and the associated coolant temperature.

Degree of protection

The degrees of protection as specified in this catalog apply. For IP56 (non-heavy sea, order code K52) the formation of ice must be avoided.

Winding and motor protection

To monitor the winding – and if specified by the classification society – to monitor the bearings, the motors are equipped with PTC thermistors, temperature sensors and resistance thermometers. Marine motors are equipped with anti-condensation heating in order to prevent possible condensation forming on the windings.

Paint finish

A paint finish according to DIN EN ISO 12944-5 C5-M is used for unprotected installation on deck, especially aggressive atmospheres or offshore applications. This is part of order code E81, which upgrades a standard marine motor for these special ambient conditions.

Special paint colors and increased layer thicknesses are available on request.

Recommended special versions:

- Installation of 2 screw-in PT100 resistance thermometers in basic circuit for anti-friction bearings – Order code A40
- IP56 degree of protection (non-heavy-sea) for protection against harmful dust deposits, protection against water jets from any direction – Order code K52
- Degree of protection IP65 on request.
- External screws and bolts manufactured out of stainless steel – Order code P45
- Upgrading a marine motor for unprotected installation on deck, use in especially aggressive atmospheres or offshore applications – Order code E81

Additional information

Order information

The fees of the classification societies for individual acceptance inspections are included in the order code.

Services for Large Drives Applications

Overview

Keep your business running and shape your digital future - with Services for Large Drives Applications

Optimizing the productivity of your equipment and operations can be a challenge, especially with constantly changing market conditions. Working with our service experts makes it easier. We understand your industry's unique processes and provide the services needed so that you can better achieve your business goals.

You can count on us to maximize your uptime and minimize your downtime, increasing your operations' productivity and reliability. When your operations have to be changed quickly to meet a new demand or business opportunity, our services give you the flexibility to adapt.

We assist in keeping your operations as energy and resource efficient as possible and reducing your total cost of ownership. As a trendsetter, we ensure that you can capitalize on the opportunities of digitalization and by applying data analytics to enhance decision making: You can be sure that your plant reaches its full potential and retains this over the longer lifespan.

You can rely on our highly dedicated team of engineers, technicians and specialists to deliver the services you need - safely, professionally and in compliance with all regulations. We are there for you, where you need us, when you need us.

www.siemens.com/lda-service

Overview

Support and Consulting

Our **LDA Portal** delivers comprehensive information, application examples, FAQs and support requests:

lda-portal.siemens.com

Technical Support and Diagnostic for advice and answers for all inquiries about functionality, handling, and fault clearance.

Field and Maintenance

A worldwide network of specially trained service personnel provides you with a highly quality service and an optimized commissioning time. By making use of a regular inspection and health check, you can maximize the availability of your plant and optimize your production processes.

Repair

Repair Services are offered on-site and in regional repair centers for fast restoration of faulty devices' functionality. Also available are extended repair services, which include additional diagnostic and repair measures, as well as emergency services.

Spare Parts

Spare Parts Services are available worldwide for smooth and fast supply of spare parts - and thus optimal plant availability. Genuine spare parts are available for up to ten years. Logistic experts take care of procurement, transport, custom clearance, storage and order management. Reliable logistics processes ensure that components reach their destination as needed.

Since not all spare parts can be kept in stock at all times, Siemens offers a preventive measure for spare parts provisioning on the customer's premises with optimized **Spare Parts Packages** for individual products, custom-assembled drive components and entire integrated drive trains - including risk consulting.

Training

From the basics and advanced to specialist skills, **LDA training** courses provide expertise right from the manufacturer - and encompass the entire spectrum of Siemens LDA products and systems for the industry. Courses are offered at various locations as well as online

Retrofit and Upgrade

Use Siemens Retrofit Services to extend the lifetime of your machinery and plants. Optimize the availability, reliability and energy efficiency of your installed motors and drives by retrofitting existing products and systems.

Digital Services by SIDRIVE IQ

To provide you with optimum support in your work, we have put together two digital service packages as part of our digital offering SIDRIVE IQ. The first package, **SIDRIVE IQ Rapid Response**, is all about getting your equipment up and running again as quickly as possible. The second package, **SIDRIVE IQ Guided Supervision**, is a service package specifically for continuous monitoring.

Service Agreements

A **Service Agreement** enables you to easily bundle a wide range of services into a single annual or multiyear agreement. You pick the services you need to match your unique requirements or fill gaps in your organization's maintenance capabilities. Programs and agreements can be customized as KPI-based and/or performance-based contracts.

Your way to find information, data, services & support and the right contact:

The Siemens LDA Portal.

Our Large Drives Applications customer web platform is all about high-voltage motors, industrial generators, medium-voltage converters and many more portfolio elements like digital services when it affects applications in the megawatt power range. You can use the platform on your Desktop PC as well as on your tablet and mobile:

www.lda-portal.siemens.com

Information & Download

Find current information about the entire Siemens Large Drives Applications portfolio over the full product life cycle: The comprehensive "**Information & Download center**" will help you to quickly access the document you need. Via the advanced main search function, you will be guided to the right information. With the "**Portfolio Finder**" you can select the required product element with a few clicks only.

Newsletter

For being up-to-date about product news published in the Information & Download center you can subscribe the Newsletter.

Services & Support

Getting fast support and service for large drives is easy by using the LDA Portal. You will find a comprehensive view about the possible services and will be guided to the right contact in a fast way. The holistic installed base view offers you opportunities to unlock the full potential of your installed assets. Fast emergency services are quickly orderable via the LDA Portal. For getting fast support from Siemens experts you can start your service requests directly in the LDA Portal.

Contacts

Address your request to the right contact easily via the "**Contact us**" functionality. Your request will be forwarded to your country specific contact partner which will contact you immediately without any language barrier.

In addition you will easily find the service and repair center next to you for getting professional maintenance and further services.

Select & Buy

Interfaces to our selection and configuration tools enable you to get project specific product information in a fast way without the need of a Siemens contact. Even if it is a price indication via our Easy Selection for high-voltage motors or a **budget and firm** offer via our Drives Technology Configurator for HV motors, generators and MV drives.

Having available a **full quotation** with price, drawings, electrical & mechanical data, delivery time and specific T&C's **in only a few minutes** offers you high potential to speed up your proposal and offer process. We empower LDA Portal users with additional rights to get the things done fully digital. If you are interested in using more digital touchpoints in your offer process or order, please contact us.

Partnership & Sales Partner

We offer extended views and information for our partners. If you want to benefit from a partnership by getting access to exclusive information and more, do not hesitate to contact us.

Overview

Get more out of your drive systems with SIDRIVE IQ

Drive systems play a key role in countless production processes and are ultimately what keeps the entire production going. Faults or failures involving components like motors and drives have costly consequences. Avoiding these faults by taking timely and deliberate action requires intelligent transparency – which allows for measures like targeted, proactive, and well-timed maintenance.

The future is digital – especially in the industrial sector. Thanks to digitalization and networked processes, companies can produce more flexibly and reliably, and they can respond to events more rapidly. Digitally enhanced drive components are an important step toward digitalized automation. With SIDRIVE IQ, you can now benefit from an Industrial Internet of Things (IIoT) digitalization solution for drive systems. Take advantage of digitalization to enter a new dimension of availability, serviceability, productivity and efficiency.

Reap the fruits of digitalization for medium voltage drives and high voltage motors with SIDRIVE IQ. The trinity of smart products, optimized plant designs and services provides you, with the insights you need, to make proactive choices you can trust – every single time.

With our **smart products** and systems with edge-capability you are able to make drive systems an “Industrial IoT platform device” for interoperability with automation and application.

Our **digital platform** gives you the perfect integration in IIoT ecosystems through modularity, scalability and connectivity with data model and processing libraries and functional user interaction and experience. Increase availability, optimize your asset management and processes for faster decision-making and a boost of productivity.

Digital **Services** by SIDRIVE IQ is the cloud-based approach for the next generation of remote and condition monitoring services. With SIDRIVE IQ, condition data from the drive train components is transferred to the cloud and analyzed by our service experts.

SIDRIVE IQ – our holistic solution and service to IIoT for your drive systems.

SIDRIVE IQ helps you to:

Boost your productivity

Reduce service and maintenance costs

Increase availability

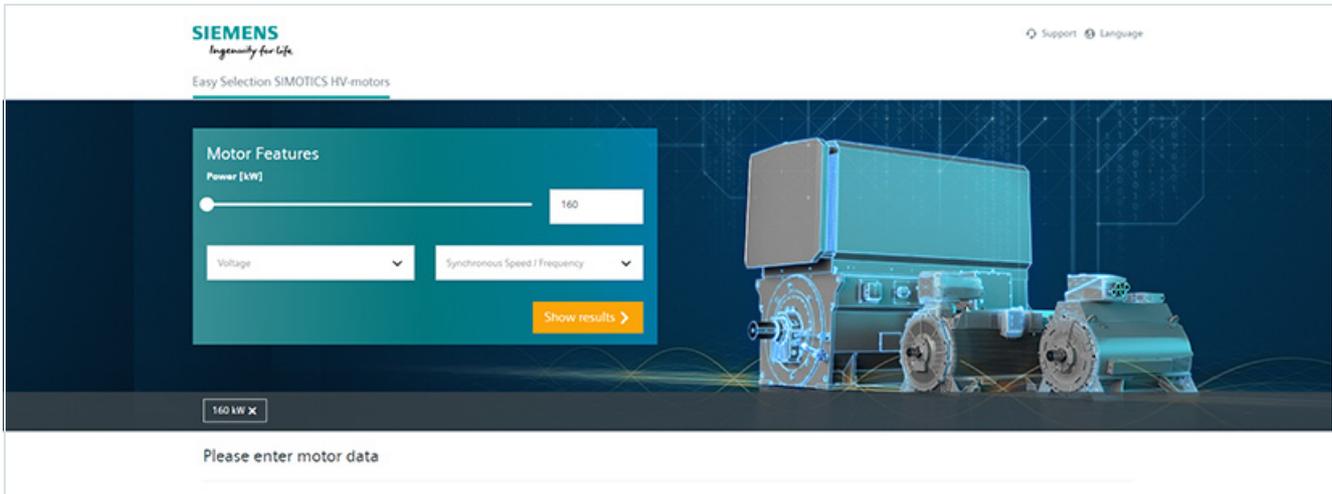

Shorten unplanned downtimes

Service & Support

Selection and configuration tools

Overview

Easy Selection SIMOTICS HV motors

The Easy Selection SIMOTICS HV motors provides a fast and easy motor selection in an early quotation phase. Based on the key search criteria, power, number of poles and voltage, the tool

provides the required motor types in a simple comparison view. For each selection result, technical data sheets, drawings and price information are available.

Drives Technology Configurator

The Drives Technology Configurator is the entry point when it comes to configuring high-voltage motors and medium-voltage converters. It supports you with configuring the optimum drives technology products for the specific application. With or without detailed product knowledge, based on detailed search criteria

the tool helps to find the right product and allows a detailed configuration of all available options. In addition to all this, comprehensive documentation comprising technical data sheets, 2D dimensional drawings and 3D models, certificates, etc. can be selected.

Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, systems, machines and networks.

In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial security concept. Siemens' products and solutions only form one element of such a concept.

Customer is responsible to prevent unauthorized access to its plants, systems, machines and networks. Systems, machines and components should only be connected to the enterprise network or the internet if and to the extent necessary and with appropriate security measures (e.g. use of firewalls and network segmentation) in place.

Additionally, Siemens' guidance on appropriate security measures should be taken into account. For more information about industrial security, please visit <http://www.siemens.com/industrialsecurity>.

Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends to apply product updates as soon as available and to always use the latest product versions. Use of product versions that are no longer supported, and failure to apply latest updates may increase customer's exposure to cyber threats.

To stay informed about product updates, subscribe to the Siemens Industrial Security RSS Feed under <http://www.siemens.com/industrialsecurity>.
